NAZARA LAUNCHES BODYCAM IN FORTNITE THROUGH AN OFFICIAL UEFN ADAPTATION

The tactical shooter's signature body-camera perspective, close-quarters combat, and high-pressure multiplayer arrive in Fortnite; developed by Virstate and published by Nazara Technologies under agreement with Reissad Studio.

Mumbai, India, September 11, 2026. Nazara Technologies and Virstate today announced that Bodycam UEFN, the official Bodycam game adaptation for Fortnite* developed under agreement with Reissad Studio is now available to players worldwide starting today.

Built by Virstate in Unreal Editor for Fortnite (UEFN), and published by Nazara Technologies, Bodycam UEFN, the game brings the franchise's signature body-camera perspective, intense close-quarters combat, realistic atmosphere, and high-pressure multiplayer gameplay into Fortnite.

Players can jump in now by searching for Bodycam in Fortnite Discover or by entering **island code: 9784-3946-5466**

Built as an official expansion of the Bodycam universe, Bodycam UEFN is designed to introduce a new generation of players to the franchise while giving existing fans a new way to experience its tension, realism, and tactical combat. The project is not a replacement for the original Bodycam PC experience, but a free-to-play gateway into its world, created specifically for Fortnite's ecosystem.

Nitish Mittersain, MD & CEO, Nazara Technologies, said, “Bodycam UEFN is Nazara’s first build inside Fortnite, and it is just the beginning. Fortnite is now one of the largest discovery platforms in the world, and we intend to build there at scale. Reissad has raised the bar with an experience that is raw, immersive, and visually stunning. Bringing Bodycam to Fortnite proves that UEFN is ready for premium-quality FPS experiences. It becomes the template for the IPs, original experiences, and partnerships we bring to this ecosystem next.”

At launch, Bodycam UEFN features Russian Building, one of the most recognizable environments from the original game, recreated for Fortnite with a focus on authenticity, atmosphere, visual fidelity, and fast tactical encounters. The map is designed for high-pressure close-quarters combat where positioning, reflexes, sound awareness, and precision determine the outcome of every fight.

Bodycam UEFN launches with three multiplayer modes:

- **Free For All** - Every player fights alone in fast-paced matches where survival depends on awareness, accuracy, and reaction time.
- **Team Deathmatch** - Two teams compete to reach the score limit first in squad-based combat inspired by classic competitive shooters.
- **Gun Game** - Players progress through an evolving arsenal by securing eliminations, racing to reach the final weapon and claim victory.

The experience also includes long-term progression systems, allowing players to climb ranks, unlock weapons, earn rewards, and pursue competitive goals through regular play. Bodycam UEFN is planned as a live experience, with future updates expected to introduce additional maps inspired by the original Bodycam, new weapons and equipment, new rewards and unlockables, seasonal updates, community events, and additional gameplay modes.

With Bodycam UEFN, Nazara Technologies aims to raise expectations of what players can experience inside Fortnite and demonstrate how major gaming IPs can use UEFN as a serious platform for franchise expansion.

“Bodycam has always been built with the ambition to stay ahead of technology rather than wait for the industry to move first,” said **Luca Dassier, Studio Director at Reissad**. He also added, “Partnering with Nazara Technologies and Virstate is what makes this expansion possible. They lead it, they own it, and they bring the publishing and development strength to build Bodycam a genuine home on Fortnite. For us, this partnership is about preparing for the future of Unreal Engine 6 by gaining hands on experience with Verse, the programming language expected to play a major role in

its ecosystem. And at the same time, Bodycam on PC remains the complete and undivided focus of our studio. This partnership is precisely what allows both projects to move forward at full speed.”

Bodycam is a trademark of Reissad Studio. Bodycam UEFN is an independently created Fortnite island developed by Nazara Technologies and Virstate under agreement with Reissad Studio and is not sponsored, endorsed, or administered by Epic Games, Inc.
