Coforge Joins SpaceX Super Intelligence Partner Network to Take Grok into Enterprise Production

PRINCETON, N.J. and GREATER NOIDA, India — November 6, 2026 — Coforge Limited (NSE: COFORGE), a global AI-native engineering services leader, today announced that it has joined the SpaceX Super Intelligence (SpaceXSI) Partner Network as a Transformation Partner. Coforge will help enterprises put the Grok portfolio to work in their business workflows, building solutions grounded in each client's operating context and taking them into production with measurable business value.

Coforge will take Grok into production through Momentuum blue, its specialized Forward Deployed Engineering (FDE) operating unit. Momentuum blue operates within client environments, embedding pods of senior FDEs, associate FDEs, and AI agents that have full accountability for delivering business outcomes measured against an agreed baseline.

The partnership is built on Coforge's strengths in AI-led engineering and modernization services, Coforge Nuuron, a composable enterprise AI enablement suite, and Coforge's deep industry expertise. Together, these capabilities give organizations a path to integrate industry-specific Grok solutions into the systems they run today, and seamlessly connect enterprise knowledge, workflows, decisions, and actions.

"Our opportunity with SpaceXSI is to help clients put the Grok portfolio to work across their businesses," said **Anup Nair, Executive Vice President and Chief AI Commercial Officer, Coforge.** "From software modernization and customer service to enterprise applications, we bring the industry context, engineering expertise and adoption capabilities to turn Grok's technology into solutions that are grounded in how each client actually operates."

The Grok portfolio includes Grok for chat, research, and analysis; Grok Models for reasoning; Grok Build for software development; Grok Bot for ongoing work across enterprise applications; Grok Voice for conversational experiences; and Grok Imagine for image and video creation. The Grok API provides a route to integrate these capabilities into enterprise solutions.

"Coforge pairs deep engineering and industry experience with a delivery model built to get Grok running in production, inside the systems clients depend on every day," said **Toni Adams, Head of Global Partnerships, SpaceXSI**. "We're glad to have Coforge in the network and look forward to working together to help our joint customers get measurable results from Grok."

The SpaceX Super Intelligence Partner Network is SpaceXSI's official program for companies building products, solutions, and services with Grok for joint prospects and customers. Transformation Partners help customers deploy the Grok platform across the enterprise and create tangible business value.

About Coforge

Coforge is an AI-native engineering services leader, where AI is the very foundation of how we design, build, and deliver intelligent solutions for our clients. We use AI and hyperspecialized industry expertise to engineer autonomous enterprises. We combine AI agents with our AI-enabled workforce, including specialized FDEs in hybrid pod-based delivery units. With a deep focus on trusted AI, our solutions are secure, governed, and enterprise-grade. We are outcome-led by design. Moving beyond AI

experimentation, we deliver measurable business outcomes – lower operating costs, faster cycle times, higher conversion rates, and sustained margin growth. Learn more at www.coforge.com.
