Any other information	We have received this PO worth Rs. 33,51,45,948.76 from RailTel, who is establishing a long-haul broadband telecom network based on MPLS technology, utilizing next-generation MPLS network systems. This new network will meet the increasing demand for bandwidth while ensuring compatibility, quality, and enhanced flexibility in transporting and routing various traffic types, including Internet Protocol (IP) data, voice, video, telepresence, and more.

	<p>The proposed solution fulfils both the functional and performance requirements of the SDN-based MPLS routers and CGNAT. The project adheres to directives by segregating Internet Leased Line (ILL) and MPLS services, deploying infrastructure to capture IPDR logs for IPv4 and IPv6 traffic, and enhancing network security and scalability across RailTel's backbone.</p> <p>The project will encompass 22 aggregation gateways and 100 service delivery Points of Presence (PoPs) across all telecom circles. The scope of work includes the supply of hardware and software at various locations of the PoPs. Additionally, the scope encompasses the design, installation, testing, and commissioning of the routers, as well as their integration with the existing network.</p>
