HCLTech introduces 20 Industry AI Solutions to transform vertical value chains with AI

NOIDA, October 08, 2026: HCLTech, a leading global technology company, has rolled out 20 purpose-built Industry AI Solutions (IAIS), continuing its strategy to build differentiated IP in Advanced AI. Combining deep domain expertise with AI capabilities, the solutions address high-value, industry-specific solutions across banking, healthcare and life sciences, aerospace, retail, telecom, mobility, energy and manufacturing.

Several of these solutions are already deployed at scale across client operations globally, while others are progressing through early-stage deployments.

A dedicated global team of engineers and domain experts have built these solutions in-house.

"AI has a potential to transform the very heart of business value chains but realising that potential requires deep domain specificity and the ability to scale. Our Industry AI solutions bridge this gap by translating domain expertise into scalable AI intelligence, accelerating value stream innovation and helping enterprises navigate rapid technological change with greater agility, and measurable outcomes." Dr. Gaurav Dhakar, Global Head - Industry AI Solutions, HCLTech

The portfolio is focused on translating AI into measurable business outcomes:

- **Manufacturing and logistics:** HCLTech's VisionX, a computer-vision AI platform, has improved response times by more than 90% and reduced operational costs by 70% across factory and warehouse environments.
- **Manufacturing:** SmartTwin enables manufacturers to simulate products and plants before physical deployment, helping deliver up to 44% faster time-to-market for new products.
- **Life sciences and healthcare:** HCLTech's Intelligent Regulatory Platform delivers regulatory intelligence, while its Intelligent Safety Platform has reduced pharmacovigilance case-processing time by 40-50%.
- **Procurement and finance operations:** Autonomous Accounts Payable, an AI-led invoice management platform, is live at a major global motorbike and tools manufacturer, cutting processing cycle time by 60%.

HCLTech plans to continue expanding its portfolio of repeatable Industry AI Solutions as enterprises move from AI experimentation towards scaled adoption and explore new solutions to unlock productivity, efficiency, innovation and growth.

About HCLTech

HCLTech is a global technology company, home to more than 223,000 people across 60 countries, delivering industry-leading capabilities centered around AI, digital, engineering, cloud and software, powered by a broad portfolio of technology services and products. We work with clients across all major verticals, providing industry solutions for Financial Services, Manufacturing, Life Sciences and Healthcare, Technology & Services, Semiconductor, Telecom and Media, Retail and CPG, Mobility and Public Services. Consolidated revenues as of 12 months ending June 2026 totaled \$14.8 billion. To learn how we can supercharge progress for you, visit hcltech.com.
