f. **Management's perception of risk factors :** The Company faces competition from domestic and international Chemical manufacturers. The Chemical industry in which your Company operates is one of the most diversified industries in the business segment. Diversification provides opportunities and also poses a threat. The Company has focused on the development of new products to meet the dynamic demands from different sectors, which have been put to various uses. In house Research and Development facility and adoption of the latest technological changes have helped in introducing new specialty custom-made products having better margins. Diversification, being a major factor for opportunities it also gives mounting pressure to satisfy the ever-changing needs of customers. The Company's Multi-Product Plant helps to produce a variety of products to cater to the needs of different customers. Diversified product portfolio and large customer base continue to be the main strengths of the Company. Also, the Chemical sector has inherent element of risk factors ranging from Raw Material procurement, storage, and plant operation safety.

Your Company, being in the manufacturing segment, requires certain raw materials that are susceptible to fluctuations in prices, and they are sensitive in nature and therefore the same cannot be imported. Also, in-house production of the same is not financially viable since it will have huge capital expenses. The Company is thus vulnerable to Ethylene Oxide price volatility which in turn is affected by the crude oil prices. Another risk factor which the Company currently facing is the ever-increasing energy prices and shipping freight costs thereby affecting the company's bottom line. The Company has developed various products to meet the dynamic demands from different sectors which has been put to various uses. In-house Research and Development facility and adoption of latest technological changes have helped in introducing new speciality custom made products having better margins. Diversification brings in opportunities but also puts pressure on human resource to satisfy the everchanging needs of customers. The Chemical sector has now moved from commodity based (sourcing of raw/refined chemicals) to need based manufactured products as per needs and high emphasis is placed on the product development, acquiring new technology and improving production facilities. For credit risk the management is careful in its credit policy towards its customers in domestic market and for exports its either advance payment or letter of credit. Your Company has a Brand Name in the chemical industry and has the advantage of deeper penetration in the market and recognition amongst its peers. Also, due to timely expansion of product facilities and capacities, upgradation of its Multi-product plant resulted in seizing more opportunities which has reflected in better turnover of the Company even during uncertain Global situation. The Company's adaptability to new product development has resulted in achieving higher sales during the year under review. The Company has been taking every possible step in order to mitigate the effects of unstable global conditions through reaching out to new customers, exploring new chemical markets and constant efforts by its R&D Team in developing unique and innovative Specialty products to suit its customer needs. Your Company started receiving certain portion of electricity at concessional rates due to its tie up with a Solar Power producing Company. As regards fluctuations in Forex, the Company has natural hedging between exports and imports.
