MANAGEMENT DISCUSSION AND ANALYSIS

This report is prepared in line with Regulation 34 and Schedule V of SEBI (LODR) Regulations, 2015.

INDIAN ECONOMY

The Indian economy continued to remain resilient during FY 2025–26, supported by domestic consumption, infrastructure development, government spending and growth across various sectors.

The continued development of infrastructure, improvement in connectivity and increasing economic activity are expected to support overall business growth. The agriculture and food sector also continues to remain an important part of the Indian economy, providing opportunities for businesses engaged in agricultural commodities and related activities.

The Company believes that the Indian economy has a positive long-term outlook and that increasing domestic demand may provide opportunities for growth in the coming years.

INDUSTRY STRUCTURE AND DEVELOPMENTS

NEWTRAC FOODS & BEVERAGES LIMITED is engaged in the business of trading in agricultural commodities and food products, including commodities such as Chana Dal and Toor Dal.

The agricultural commodities business is influenced by factors such as crop production, weather conditions, government policies, market demand, commodity prices and availability of raw materials.

The Company continues to evaluate opportunities in the agricultural and food commodity sector and intends to strengthen its business operations based on market conditions and available opportunities.

OPPORTUNITIES AND THREATS

Opportunities

India has a large and growing domestic market for agricultural commodities and food products. Increasing population, urbanisation and changing consumption patterns are expected to support demand for food and agricultural products.

The Company may benefit from opportunities arising from increasing demand for pulses and other agricultural commodities. The Company also intends to explore new business opportunities and strengthen its presence in the agricultural commodity trading business.

Threats

The agricultural commodity business is subject to fluctuations in commodity prices, availability of agricultural products, weather conditions, crop production and changes in government policies.

Changes in market prices may affect margins and profitability. Competition in the trading and food commodity sector may also impact the Company's business.

The Company will continue to monitor market conditions and take appropriate measures to manage these risks.

SEGMENT-WISE PERFORMANCE

The Company operates primarily in a single business segment, i.e., trading in agricultural commodities and food products.

Accordingly, there is no separate reportable segment for the purpose of segment reporting. The demand for pulses and other agricultural commodities remains supported by their importance in the Indian food consumption pattern. The Company continues to assess market opportunities and work towards improving its business performance.

QUALITY AND FUTURE OUTLOOK

The Company is focused on maintaining the quality of its products and providing products in accordance with market requirements.

Going forward, the Company intends to focus on strengthening its business operations, exploring new opportunities in the agricultural commodity and food products sector and improving its overall operating performance.

The management remains optimistic about the long-term prospects of the business and will continue to take suitable measures based on market conditions.

THREATS AND CONCERNS

The Company's business may be affected by fluctuations in commodity prices, changes in demand and supply, weather conditions, government policies, inflation and general economic conditions.

The Company follows a risk management approach to identify and monitor significant business risks and take appropriate measures for their mitigation.

The management regularly reviews the Company's business environment and takes necessary steps to address emerging risks and challenges.

INTERNAL CONTROL SYSTEMS

The Company has adequate internal control systems commensurate with the size and nature of its business operations.

The internal control framework is intended to ensure proper safeguarding of assets, accuracy of financial records, operational efficiency and compliance with applicable laws and regulations.

The management periodically reviews the effectiveness of the internal control systems and takes corrective measures wherever required.

OPERATIONAL PERFORMANCE

During FY 2025–26, the Company continued to focus on its business activities in the agricultural commodity and food products sector.

The detailed financial performance of the Company for FY 2025–26 has been provided separately in the Directors' Report and Financial Statements forming part of this Annual Report.

HUMAN RESOURCES

Human resources are an important part of the Company's operations. The Company believes in maintaining a professional and positive working environment and providing appropriate support for the development of its employees.

The Company continues to focus on efficient utilisation of its human resources in line with its business requirements.

CAUTIONARY STATEMENT

Statements in this Management Discussion and Analysis describing the Company's objectives, expectations, estimates and future plans may constitute forward-looking statements.

Actual results may differ materially from those expressed or implied due to various factors, including changes in economic conditions, market conditions, government policies, commodity prices, competition and other risks associated with the Company's business.

INDEPENDENT AUDITOR'S REPORT

**To the Members of Newtrac Foods & Beverages Limited
(Formerly Known as Markobenz Ventures Limited)**

Report on the Audit of the Financial Statements

Disclaimer of Opinion

We were engaged to audit the accompanying financial statements of **Newtrac Foods & Beverages Limited** ("the Company"), which comprise the Balance Sheet as at 31st March, 2026 and the Statement of Profit and Loss, for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information (hereinafter referred to as "the financial statements").

We do not express an opinion on the accompanying financial statements of the Company. Because of the significance of the matter described in the Basis for Disclaimer of Opinion section of our report, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on these financial statements, and accordingly, we do not express an opinion on the said financial statements.

Basis for Disclaimer of Opinion

The Management has not made available to us books of account, records and supporting documents that are necessary for conducting our audit such as bank statements, loan agreements, trade receivables and trade payables confirmations and Invoices and supporting vouchers for sales and purchases made during the year. Further, we were unable to confirm or verify by alternative means the state of affairs of the Company for the year ended 31 March 2026 its (loss) and its cash flows for the year ended on that date.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position and financial performance of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under section 133 of the Act, read with relevant rules issued thereunder.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our responsibility is to conduct an audit of the Company's financial statements in accordance with Standards on Auditing issued by the Institute of Chartered Accountants of India and to issue an auditor's report. However, because of the matters described in the Basis for Disclaimer of Opinion section of our report, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on these financial statements.

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in India in terms of the Code of Ethics issued by the Institute of Chartered Accountants of India and the relevant provisions of the Act, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Report on Other Legal and Regulatory Requirements

As required by the Companies (Auditor's Report) Order, 2020 ("the Order") issued by the Central Government of India in terms of section 143(11) of the Act, we give in "Annexure 1", a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

As required by Section 143(3) of the Act, and because of the significance of the matters described in the Basis for Disclaimer of Opinion section above, we report that:

- a) We were unable to obtain all the information and explanations which, to the best of our knowledge and belief, were necessary for the purpose of our audit of the aforesaid financial statements.
- b) Due to the possible effects of the matters described above, we are unable to state whether proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
- c) Because of the significance of the matters described in the Basis for Disclaimer of Opinion section above, we are unable to state whether the Balance Sheet and the Statement of Profit and Loss dealt with by this Report are in agreement with the books of account.

ANNEXURE 2 TO THE INDEPENDENT AUDITOR'S REPORT

[Referred to in paragraph 2 under 'Report on Other Legal and Regulatory Requirements' in the Independent Auditor's Report of even date to the members of **Newtrac Foods & Beverages Limited (Formerly Known as Markobenz Ventures Limited)** on the Ind AS financial statements for the year ended March 31, 2026]

Report on the Internal Financial Controls over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We were engaged to audit the internal financial controls over financial reporting of **Newtrac Foods & Beverages Limited (Formerly Known as Markobenz Ventures Limited)** as of March 31, 2026 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, to the extent applicable to an audit of internal financial controls, both issued by the ICAI. Because of the matter described in Disclaimer of Opinion paragraph below, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on internal financial controls system over financial reporting of the Company.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Disclaimer of Opinion

According to the information and explanation given to us, the Company has not established its internal financial control over financial reporting on criteria based on or considering the essential components of internal control stated in the Guidance Note issued by ICAI.

Because of this reason, we are unable to obtain sufficient appropriate audit evidence to provide a basis for our opinion whether the Company had adequate internal financial controls over financial reporting and whether such internal financial controls were operating effectively as at March 31, 2026.

We have considered the disclaimer reported above in determining the nature, timing, and extent of audit tests applied in our audit of the Ind AS financial statements of the Company, and the disclaimer does not affect our opinion on the Ind AS financial statements of the Company.

Background

Newtrac Foods & Beverages Limited ("the Company") is a public company domiciled in India, with its registered office situated at Office G-2, Samarpan Complex, Link, Opp Satam Wadi, Chakala, Sahar, Sahar P & T Colony, Mumbai, Maharashtra, India, 400 099. The Company was incorporated on December 07, 1989. The shares of the Company are listed on the Bombay Stock Exchange (BSE). The Company is engaged in the business of manufacturing, bleaching, dyeing, printing, and knitting high-pile fur fabrics, as well as cloth and other fabrics made, from various materials, such as acrylic, polyester, cotton, silk, artificial silk, wool, and other suitable materials. The company has resumed trading agricultural commodities under the guidance of Nirupama Khandke, its Promoter. Markobenz Ventures Limited is a Mumbai-based company that now trades in organic agricultural commodities in the B2B sector.

1. Basis of preparation

(i) Statement of compliance with Indian Accounting Standards:

These Ind AS financial statements ("the Financial Statements") have been prepared in accordance with the Indian Accounting Standards ('Ind AS') as notified by Ministry of Corporate Affairs ('MCA') under Section 133 of the Companies Act, 2013 ('Act') read with the Companies (Indian Accounting Standards) Rules, 2015, as amended and other relevant provisions of the Act. The Company has uniformly applied the accounting policies for all the periods presented in these financial statements.

The financial statements for the year ended March 31, 2026 were authorised and approved for issue by the Board of Directors on May 30, 2026.

The material accounting policies adopted for preparation and presentation of these financial statements are included in Note 2. These policies have been applied consistently by the Company for all the periods presented in these financial statements.

(ii) Current and non-current classification

All assets and liabilities have been classified and presented as current or non-current in accordance with the Company's normal operating cycle other criteria set out in the Schedule III to the Act.

(iii) Functional and presentation currency

These financial statements are presented in Indian Rupees (₹), which is also the Company's functional currency. All amounts have been rounded-off to the nearest lacs, unless otherwise indicated.

(iv) Basis of measurement

The financial statements have been prepared on the historical cost basis except for the following items:

Items	Basis of measurement
Certain financial assets and liabilities	Fair value
Net defined benefit asset/liability	Fair value of plan asset less present value of defined benefit obligation

(v) Use of estimates and judgements

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the related disclosures. Actual results may differ from these estimates.

Significant management judgements:

- **Recognition of deferred tax assets** – The extent to which deferred tax assets can be recognised is based on an assessment of the probability of the future taxable income against which the deferred tax assets can be utilised.
- **Business model assessment** – The Company determines the business model at a level that reflects how groups of financial assets are managed together to achieve a business objective. This assessment includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated. The Company monitors financial assets measured at amortised cost that are derecognised prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Company's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and accordingly prospective change to the classification of those assets are made.
- **Evaluation of indicators for impairment of assets** – The evaluation of applicability of indicators of impairment of assets requires assessment of several external and internal factors which could result in deterioration of recoverable amount of the assets.
- **Classification of leases** – Ind AS 116 requires lessees to determine the lease term as the non-cancellable period of a lease adjusted with any option to extend or terminate the lease if the use of such option is reasonably certain. The Company makes an assessment on the expected lease term on a lease-by-lease basis and thereby assesses whether it is reasonably certain that any options to extend or terminate the contract will be exercised. In evaluating the lease term, the Company considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of the lease and the importance of the underlying asset to the Company's operations taking into account the location of the underlying asset and the availability of suitable alternatives. The lease term in future periods is reassessed to ensure that the lease term reflects the current economic circumstances. After considering current and future economic conditions, the Company has concluded that no changes are required to lease period relating to the existing lease contract.
- **Expected credit loss (ECL)** – The measurement of expected credit loss allowance for financial assets measured at amortised cost requires use of complex models and significant assumptions about future economic conditions and credit behaviour (e.g., likelihood of customers defaulting and resulting losses). The Company makes significant judgements regarding the following while assessing expected credit loss:
 - Determining criteria for significant increase in credit risk
 - Establishing the number and relative weightings of forward-looking scenarios for each type of product/market and the associated ECL
 - Establishing groups of similar financial assets for the purposes of measuring ECL.
- **Provisions** – At each Balance Sheet date, based on the management judgment, changes in facts and legal aspects, the Company assesses the requirement of provisions against the outstanding contingent liabilities. However, the actual future outcome may be different from this judgement.

Significant estimates:

- **Useful lives of depreciable/amortisable assets** – Management reviews its estimate of useful lives, residual values, and method of depreciation of depreciable/amortisable assets at each reporting date, based on the expected utility of the assets. Uncertainties in these estimates relate to technical and economic obsolescence that may change the utility of assets.
- **Defined benefit obligation (DBO)** – Management's estimate of the DBO is based on several underlying assumptions such as standard rates of inflation, mortality, discount rate and anticipation of future salary increases. Variation in these assumptions may significantly impact the DBO amount and the annual defined benefit expenses.

- **Fair value measurements** – Management applies valuation techniques to determine the fair value of financial instruments (where active market quotes are not available). This involves developing estimates and assumptions consistent with how market participants would price the instrument.

2 Summary of material accounting policies

(i) Revenue

Effective April 1, 2018, the Company has applied Ind AS 115 which establishes a comprehensive framework for determining whether, how much and when revenue is to be recognized. The Standard requires apportioning revenue earned from contracts to individual promises, or performance obligations, on a relative stand-alone selling price basis, using a five-step model. Ind AS 115 replaces Ind AS 18 Revenue and Ind AS 11 Construction Contract. The Company has adopted Ind AS 115 using the cumulative effect method. The effect of initially applying this standard is recognized at the date of initial application (i.e., April 1, 2018) and the comparative information in the statement of profit and loss is not restated – i.e., the comparative information continues to be reported under Ind AS 18.

Revenue from sale of goods

Revenue is recognised upon transfer of control of promised product or services to customer in an amount that reflect the consideration which the Company expects to receive in exchange for those product or services at the fair value of the consideration received or receivable, which is generally the transaction price, net of any taxes/duties and discounts.

The Company satisfies a performance obligation and recognises revenue over time, if one of the following criteria is met:

- a. The customer simultaneously receives and consumes the benefits provided by the Company's performance as the Company performs; or
- b. The Company's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- c. The Company's performance does not create an asset with an alternative use to the Company and an entity has an enforceable right to payment for performance completed to date.

For performance obligations where one of the above conditions are not met, revenue is recognised at the point in time at which the performance obligation is satisfied.

Revenue from sale of products is recognised at a time on which the performance obligation is satisfied.

Recognition in case of local sales is generally recognised on the dispatch of goods. Revenue from export sales is generally recognised on the basis of the dates of 'On Board Bill of Lading'. The Company recognises provision for sales return, based on the historical results, measured on net basis of the margin of the sale.

Other operating income

Export benefits are recognised in the year of export when right to receive the benefit is established and conditions attached to the benefits are satisfied.

(ii) Other income

Rental income

Rental income from investment property is recognised as part of other income in profit or loss on a straight-line basis over the term of the lease except where the rentals are structured to increase in line with expected general

inflation. Lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease.

Interest income

Interest income on time deposits and inter corporate loans is recognised using the effective interest method.

The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to the gross carrying amount of the financial asset.

Commission income

Commission income are recognised in Statement of Profit or Loss only when the relevant services have been rendered.

(iii) Employee Benefits

Short term employee benefits:

Short term employee benefit obligations are measured on an undiscounted basis and are expensed as the related services are provided. Benefits such as salaries, wages, and bonus etc. are recognised in the statement of profit and loss in the year in which the employee renders the related service. The liabilities are presented as current employee benefit obligation in the balance sheet.

Long term employee benefits:

Defined contribution plan: Provident fund

All employees of the Company are entitled to receive benefits under the Provident Fund, which is a defined contribution plan. Both the employee and the employer make monthly contributions to the plan at a predetermined rate as per the provisions of The Employees Provident Fund and Miscellaneous Provisions Act, 1952. These contributions are made to the fund administered and managed by the Government of India. The Company has no further obligations under the plan beyond its monthly contributions. Obligation for contribution to defined contribution plan are recognised as an employee benefit expense in statement of profit and loss in the period during which the related services are rendered by the employees.

Defined Benefit Plan: Gratuity

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan.

The Company provides for retirement benefits in the form of Gratuity, which provides for lump sum payments to vested employees on retirement, death while in service or on termination of employment in an amount equivalent to 15 days basic salary for each completed year of service. Vesting occurs upon completion of five years of service. Benefits payable to eligible employees of the Company with respect to gratuity is accounted for on the basis of an actuarial valuation as at the balance sheet date.

The present value of such obligation is determined by the projected unit credit method and adjusted for past service cost and fair value of plan assets as at the balance sheet date through which the obligations are to be settled. The resultant actuarial gain or loss on change in present value of the defined benefit obligation or change in return of the plan assets is recognised as an income or expense in the other comprehensive income. The Company's obligation in respect of defined benefit plans is calculated by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The Company determines the net interest expense/(income) on the net defined benefit liability/(asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability/(asset), taking into account any changes in the net defined benefit liability/(asset) during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in the statement of profit and loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service ('past service cost' or 'past service gain') or the gain or loss on curtailment is recognised immediately in the statement of profit and loss. The Company recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.

The Plan assets of the Company are managed by Life Insurance Corporation of India through a trust created by the Company in terms of an insurance policy taken on fund obligations with respect to its gratuity plan.

Other long-term benefits: Compensated absences

Benefits under the Company's compensated absences scheme constitute other employee benefits. The liability in respect of compensated absences is provided on the basis of an actuarial valuation using the Projected Unit Credit Method done by an independent actuary as at the balance sheet date. Actuarial gain and losses are recognised immediately in other comprehensive income.

(iv) Tax expense

Income tax comprises current and deferred tax. It is recognised in the statement of profit and loss except to the extent that it relates to a business combination or to an item recognised directly in equity or in other comprehensive income.

Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates (and tax laws) enacted or substantively enacted by the reporting date.

Current tax assets and current tax liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes. Deferred tax is also recognised in respect of carried forward tax losses and tax credits. Deferred tax is not recognised for:

- temporary differences arising on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss at the time of the transaction;
- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which they can be used. The existence of unused tax losses is strong evidence that future taxable profit may not be available. Therefore, in case of a history of recent losses, the Company recognises a deferred tax asset only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which such deferred tax asset can be realised. Deferred tax

assets – unrecognised or recognised, are reviewed at each reporting date and are recognised/ reduced to the extent that it is probable/ no longer probable respectively that the related tax benefit will be realised.

(v) Inventories

Raw materials, stores and spares, work-in-progress, manufactured finished goods and traded goods are valued at lower of cost or net realisable value. The comparison of cost and net realisable value is made on an item by item basis. Cost comprises of all cost of purchase, cost of conversion and other cost incurred in bringing them to their respective present location and condition. Cost is determined using first in, first out method of inventory valuation.

Loose tools and scrap are valued at estimated realisable value.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

Provision of obsolescence on inventories is considered on the basis of management's estimate based on demand and market of the inventories.

(vi) Leases

As lessor

Leases for which the Company is a lessor classified as finance or operating lease. Lease income from operating leases where the Company is a lessor is recognised in income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their nature.

(vii) Cash and cash equivalents

Cash and cash equivalents consist of cash, bank balances in current accounts and short term highly liquid investments that are readily convertible to cash with original maturities of three months or less at the time of purchase and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current financial liabilities in the balance sheet.

(viii) Provisions, contingent liabilities, and contingent assets

Provisions

The Company creates a provision when there is present obligation as a result of a past event that probably requires an outflow of resources, and a reliable estimate can be made of the amount of obligation.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows (representing the best estimate of the expenditure required to settle the present obligation at the balance sheet date) at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as finance cost.

Contingent liability

Contingent liabilities are possible obligations that arise from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote.

Contingent assets

Contingent assets are possible assets that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company.

(ix) Property, plant and equipment (including Capital work-in-progress)

Recognition and measurement

All items of property, plant and equipment are stated at historical cost less depreciation. Freehold land is carried at cost. All other items of property, plant and equipment are stated at cost net of recoverable taxes (wherever applicable), which includes capitalised borrowing costs less depreciation and impairment, if any.

Cost of an item of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes, if any, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its working condition for its intended use and estimated costs of dismantling and removing the item and restoring the site on which it is located.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in the statement of profit and loss.

On transition to Ind AS, the Company had elected to continue with carrying value of all its property, plant and equipment recognised as at 1 April 2016 measured as per the previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

Subsequent expenditure

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced.

All other repairs and maintenance are charged to the Statement of Profit and Loss during the reporting period in which they are incurred.

Depreciation methods, estimated useful lives and residual values

Depreciation is calculated on cost of items of property, plant and equipment less their estimated residual value over their useful life using straight line method and is recognised in the statement of profit and loss.

The estimated useful lives of items of property, plant and equipment for the current and comparative periods are as under and the same are equal to lives specified as per schedule II of the Act.

The useful lives of the assets are as under:

Particulars	Useful lives (in years)
Tangible assets:	
Office equipment	5 Years
Computers	3 Years
Furniture & Fixtures	10 Years

Based on technical evaluation and consequent advice, the management believes that its estimates of useful lives as given above best represent the period over which management expects to use these assets. Depreciation on addition to property, plant and equipment is provided on pro-rata basis from the date the assets are ready for intended use. Depreciation on sale/discard from property, plant and equipment is provided for up to the date of sale, deduction or discard of property, plant and equipment as the case may be.

Depreciation method, useful lives and residual values are reviewed at each financial year-end, and changes, if any, are accounted for prospectively.

(x) Impairment of non-financial assets

The Company's non-financial assets, other than inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's or CGU's recoverable amount is estimated.

For impairment testing, assets that do not generate independent cash inflows are grouped together into cash-generating units (CGUs). Each CGU represents the smallest group of assets that generates cash inflows that are largely independent of the cash inflows of other assets or CGUs.

The recoverable amount of a CGU (or an individual asset) is the higher of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the CGU (or the asset).

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its estimated recoverable amount. Impairment losses are recognised in the statement of profit and loss. Impairment loss recognised in respect of a CGU is allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets of the CGU (or group of CGUs) on a pro rata basis.

After impairment, depreciation/amortisation is provided on the revised carrying amount of the asset over its remaining useful life.

(xi) Financial instruments

Initial recognition and measurement

Trade receivables and debt securities issued are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset or financial liability is initially measured at fair value plus, transaction costs that are directly attributable to its acquisition or issue, except for an item recognised at fair value through profit and loss. Transaction cost of financial assets carried at fair value through profit and loss is expensed in the statement of profit and loss.

Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at:

- amortised cost,
- Fair value through other comprehensive income (FVOCI), or
- Fair value through profit and loss (FVTPL)

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI (designated as FVOCI – equity investment). This election is made on an investment by investment basis.

All financial assets not classified to be measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI or at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets: Business model assessment

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated – e.g., whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

Financial assets: Assessment whether contractual cash flows are solely payments of principal and interest
For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g., liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable interest rate features; prepayment and extension features; and
- terms that limit the Company's claim to cash flows from specified assets (e.g., non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a significant discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

Financial assets: Subsequent measurement and gains and losses

Financial assets at amortised cost: These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses, if any. Interest income and impairment are recognised in the statement of profit and loss. Any gain or loss on derecognition is recognised in statement of profit and loss.

Financial assets at FVTPL: These assets are subsequently measured at fair value. Net gains and losses, including any interest income, are recognised in the statement of profit and loss.

Debt investments at FVOCI: These assets are subsequently measured at fair value. Interest income under the effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On Derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.

Equity investments at FVOCI: These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are not reclassified to profit or loss.

Financial liabilities: classification, subsequent measurement & gain and loss

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held for trading, or it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in the statement of profit and loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in the statement of profit and loss. Any gain or loss on derecognition is also recognised in the statement of profit and loss.

Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the assets and settle the liabilities simultaneously.

Derecognition

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

The Company also derecognises a financial liability when its terms are modified and the cash flows under the modified terms are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognised in the statement of profit and loss.

Impairment of financial instruments

The Company recognises loss allowances for expected credit losses on:-

- Financial assets measured at amortised cost; and
- Financial assets measured at FVOCI- debt investments

At each reporting date, the Company assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit - impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being past due for agreed credit period;
- the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- it is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

Expected credit loss

Loss allowances for trade receivables are always measured at an amount equal to lifetime expected credit losses.

Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial instrument.

12-month expected credit losses are the portion of expected credit losses that result from default events that are possible within 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

In all cases, the maximum period considered when estimating expected credit losses is the maximum contractual period over which the Company is exposed to credit risk.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating expected credit losses, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is more than agreed credit period.

The Company considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- the financial asset is past due and not recovered within agreed credit period.

Measurement of expected credit losses

Expected credit losses are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e., the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive).

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets disclosed in the Balance Sheet.

Write-off

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

(xii) Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. The weighted average numbers of equity shares outstanding during the period are adjusted for events such as bonus issue, share split or consolidation of shares.

For calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares. The dilutive potential equity shares are deemed converted into equity shares as at the beginning of the period unless they have been issued at a later date.

(xiii) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker.

Newtrac Foods & Beverages Limited
(Formerly known as Markobenz Ventures Limited)
Notes to the Ind AS Financial Statements for the year ended March 31, 2026

In accordance with Ind AS 108 – Operating Segments, the operating segments used to present segment information are identified on the basis of internal reports used by the Company's Management to allocate resources to the segments and assess their performance.

Segment profit is used to measure performance as management believes that such information is the most relevant in evaluating the results of certain segments relative to other entities that operate within these industries. Inter-segment pricing is determined on an arm's length basis.

The operating segments have been identified on the basis of the nature of products/services. Further:

1. Segment revenue includes sales and other income directly identifiable with / allocable to the segment including inter-segment revenue.
2. Expenses that are directly identifiable with / allocable to segments are considered for determining the segment result. Expenses which relate to the Group as a whole and not allocable to segments are included under unallocable expenditure.
3. Income which relates to the Group as a whole and not allocable to segments is included in unallocable income.
4. Segment assets and liabilities include those directly identifiable with the respective segments. Unallocable assets and liabilities represent the assets and liabilities that relate to the Group as a whole and not allocable to any segment.

The Board of Director(s) are collectively the Company's 'Chief Operating Decision Maker' or 'CODM' within the meaning of Ind AS 108.

Fair value hierarchy

Level 1: It includes financial instruments measured using quoted prices.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. The fair value of financial assets and liabilities included in Level 3 is determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes of similar instruments.

The carrying amounts of trade receivables, cash and cash equivalents and other financial assets and liabilities, approximates the fair values, due to their short-term nature. Fair value of financial assets and financial liabilities is similar to the carrying value as there is no significant differences between carrying value and fair value.

b). Financial risk management

The Company has exposure to the following risks arising from financial instruments:

- Credit risk
- Liquidity risk
- Market risk

(i). Credit risk

The maximum exposure to credit risks is represented by the total carrying amount of these financial assets in the Balance Sheet:

Particulars	As at	As at
	March 31, 2026	March 31, 2025
Trade receivables	582.96	1,964.32
Cash and cash equivalents	0.58	95.53
Other financial assets	405.44	321.42

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers.

The Company's credit risk is primarily to the amount due from customers and loans. The Company maintains a defined credit policy and monitors the exposures to these credit risks on an ongoing basis. Credit risk on cash and cash equivalents is limited as the Company generally invests in deposits with scheduled commercial banks with high credit ratings assigned by domestic credit rating agencies.

The Company has not applied expected credit loss model as per Ind AS 109 used to assess the impairment loss or gain on trade receivables. However the Company based upon historical experience determines an impairment allowance for loss on receivables.

When a trade receivable is credit impaired, it is written off against trade receivables and the amount of the loss is recognised in the income statement. Subsequent recoveries of amounts previously written off are credited to the income statement.

The gross carrying amount of trade receivables is 582.96 lacs (PY: 31 March, 2025: Rs.1,964.32 lacs). Trade receivables are generally realised within the credit period.

The Company's exposure to credit risk for trade receivables are as follows:

Particulars	As at	As at
	March 31, 2026	March 31, 2025

(ii). Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are fallen due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The Company believes that its liquidity position of Rs. .58 Lacs (PY: 31 March 2025: Rs. 95.53 Lacs) and the anticipated future internally generated funds from operations will enable it to meet its future known obligations in the ordinary course of business.

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of credit facilities to meet obligations when due. The Company's policy is to regularly monitor its liquidity requirements to ensure that it maintains sufficient reserves of cash and funding from Company companies to meet its liquidity requirements in the short and long term.

The Company's liquidity management process as monitored by management, includes the following:

- Day to day funding, managed by monitoring future cash flows to ensure that requirements can be met.
- Maintaining rolling forecasts of the Company's liquidity position on the basis of expected cash flows.

Exposure to liquidity risk

Following are the remaining contractual maturities of financial liabilities at the reporting date.

(iii). Market risk

Market risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk. Since the company do not have any Loan from Banks, it does not attract any market risk.

31 Capital Management

For the purpose of the Company's capital management, capital includes issued equity share capital and all other equity reserves attributable to the equity holders of the Company.

Management assesses the Company's capital requirements in order to maintain an efficient overall financing structure. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

To maintain or adjust the capital structure, the Company may return capital to shareholders, raise new debt or issue new shares.

The Company monitors capital on the basis of the debt to capital ratio, which is calculated as interest-bearing debts divided by total capital (equity attributable to owners of the parent plus interest-bearing debts).

9	Creditors turnover Ratio	Credit purchase/ Average trade payables	2.77	6.67	(58.49%)	refer note ix

Reason for changes:

- | | |
|---------------------------------|---|
| (i) Return on equity ratio | Return on equity decreased substantially due to loss in current year |
| (ii) Debt Equity Ratio | Sharp rise because Company has taken loan in the current year. |
| (iii) Earning per share | During the year, the Company has incurred losses. |
| (iv) Current ratio | Major decrease in debtors due to decrease in sales compare to decrease in current liabilities. |
| (v) Liquid ratio | Major decrease in debtors due to decrease in sales compare to decrease in current liabilities. |
| (vi) Return on capital employed | Return on equity decreased due to substantial losses in current year on account of decrease in sales. |
| (vii) Net Profit to Sales | Decreased substantially due to the net loss for the year, as the steep fall in sales |
| (viii) Debtors turnover Ratio | Decreased significantly mainly on account of the steep fall in credit sales during the year, while average trade receivables did not decline proportionately, reflecting slower recovery relative to the reduced volume of sales. |
| (ix) Creditors turnover Ratio | Decreased in line with the fall in credit purchases reflecting reduced business activity, while payments to creditors did not reduce proportionately. |
