TCS launches SovereignSecure Cloud™ in Europe

To deliver secure, compliant cloud architectures enabling true digital sovereignty for enterprises in EU

FRANKFURT | MUMBAI, May 26, 2026: [Tata Consultancy Services](#) (TCS) (BSE: 532540, NSE: TCS), a global leader in IT services, consulting, and business solutions, has expanded its global cloud portfolio with the launch of SovereignSecure Cloud™ in Europe. This bespoke offering, designed specifically for governments, public sector enterprises, and regulated industries, combines sovereign cloud architecture with AI capabilities to enable sovereignty across data, operations and digital infrastructure.

In the European Union (EU), the offerings will enable enterprises to achieve digital autonomy, strengthen regulatory compliance and enhanced security in an increasingly complex global environment without compromising on the speed, agility, and interoperability essential to modern businesses. The launch of TCS SovereignSecure Cloud™ in the EU builds on its successful rollout in India in 2025, followed by expansions into Kenya, East Africa and the Philippines.

TCS SovereignSecure Cloud™ for the EU has been designed to provide strategic autonomy through a multi-layered approach. It comprises a sovereign cloud layer delivered through hyperscalers, providing scale and the flexibility to operate securely within the EU regulatory framework. The national sovereign cloud layer enables country-specific localization while bringing operations under a unified control plane. And its enterprise cloud services layer leverages the EU-specific TCS Enterprise Cloud Framework, a unified orchestration and control layer that enables enterprises to dynamically apply the appropriate level of sovereignty across data, operations, and technology based on workload, risk, and sector.

Sapthagiri Chapalapalli, Head of Europe, TCS, said, *“European organizations are looking to strike a balance between addressing supply chain and sovereignty risks while ensuring leverage of frontier technologies to be globally competitive. TCS SovereignSecure Cloud solutions mark an important milestone for TCS in Europe, as our customers can now benefit from a pragmatic approach to cloud that ensures resilience and sovereignty that is contextualized to the enterprise.”*

TCS is also introducing the TCS **Sovereignty Consulting and Delivery Framework in the EU** to help organizations become a "minimum viable sovereign enterprise" by finding the right balance between control and flexibility. It recognizes that not all workloads need the same level of sovereign protection. Using a practical, risk-based approach, it categorises workloads by importance and applies the right level of sovereignty to each, focusing effort where they deliver the greatest impact and risk mitigation.

As enterprises and governments across Europe accelerate their digital transformation journeys, the need for secure, compliant and sovereign cloud architectures has never been more critical. With SovereignSecure Cloud™, TCS is bringing together the scale of hyperscalers, localized sovereign controls, and AI-led capabilities to help organizations achieve digital autonomy without compromising on agility, innovation or operational resilience.

This new TCS SovereignSecure Cloud™ offering leverages TCS' strength in the European region, enabling

organizations to innovate and grow with more flexibility. Operating in Europe for over 45 years, TCS has a diverse workforce operating from 58 offices across the region. TCS drives digital transformation for some of Europe’s leading multinationals adapting to the changing digital landscape of today across industries such as banking and financial services, manufacturing, telecom, retail, travel, logistics, and more. TCS is committed to serving as a trusted IT service provider across its TCS European Delivery Network of 10 data centres and 21 delivery locations across Europe.

About Tata Consultancy Services Ltd (TCS)

Tata Consultancy Services (BSE: 532540, NSE: TCS) is the technology partner of choice for industry-leading organizations worldwide. Since its inception in 1968, TCS has upheld the highest standards of innovation, engineering excellence and customer service.

It has set an aspiration to become the world's largest AI-led technology services company and is enabling its clients to transform themselves across the full AI stack, from infrastructure to intelligence.

Rooted in the heritage of the Tata Group, TCS is focused on creating long term value for its clients, its investors, its employees, and the community at large. With a highly skilled workforce spread across 56 countries and 194 service delivery centers across the world, the company has been recognized as a top employer in six continents. With the ability to rapidly apply and scale new technologies, the company has built long term partnerships with its clients – helping them emerge as perpetually adaptive enterprises. Many of these relationships have endured into decades and navigated every technology cycle, from mainframes in the 1970s to artificial intelligence today.

TCS sponsors 14 of the world’s most prestigious marathons and endurance events, including the TCS New York City Marathon, TCS London Marathon, Tata Mumbai Marathon, and TCS Sydney Marathon with a focus on promoting health, sustainability, and community empowerment.

TCS generated consolidated revenues of over US \$30 billion in the fiscal year ended March 31, 2026.
