Dear Sir/Madam,

Sub: Intimation of Press Release pursuant to Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015.

Pursuant to **Regulation 30** read with Schedule III of **SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015**, please find enclosed herewith the Press Release dated **August 04, 2026**, for commissioning an additional 2.5 GWh Battery Energy Storage System (BESS) manufacturing line by M/s. **Lineage Power Private Limited** (“**Material Subsidiary**”), taking the Group’s installed BESS manufacturing capacity from 2.5 GWh to 5 GWh.

We hereby request you to take note of the same.

Thanking You,

For PACE DIGITEK LIMITED

Press Release

Pace Digitek Group Achieves 5 GWh BESS Manufacturing Capacity with Commissioning of Additional 2.5 GWh Manufacturing Line

Expansion builds on one year of BESS manufacturing operations and supports execution of the Company's growing BESS order book, project pipeline and product supplies

Bengaluru, 4 August 2026: Pace Digitek Limited (NSE: PACEDIGITK | BSE: 544550) announced that its subsidiary, Lineage Power Private Limited (LPPL), has commissioned an additional 2.5 GWh Battery Energy Storage System (BESS) manufacturing line, taking the Group's installed BESS manufacturing capacity from 2.5 GWh to 5 GWh.

The commissioning of the additional manufacturing line marks an important milestone in Pace Digitek's BESS business as the Company continues to scale its manufacturing capabilities in line with the increasing demand for battery energy storage solutions. The expanded manufacturing capacity enhances the Company's ability to execute its growing BESS order book, project pipeline and product supplies while improving manufacturing flexibility, production planning and delivery capabilities across utility-scale and Commercial & Industrial (C&I) applications.

Over the past year, Pace Digitek has manufactured over 300 utility-scale BESS containers, representing ~1.5 GWh of battery energy storage capacity. The expansion to 5 GWh builds on this execution track record and strengthens the Company's ability to support its growing BESS business in line with customer requirements and market opportunities.

India's battery energy storage market continues to expand, supported by increasing renewable energy deployment, grid balancing requirements and growing adoption across utility-scale and C&I applications. As deployments scale, manufacturing capacity, execution capabilities and supply chain integration are becoming increasingly important.

Commenting on the development, Mr. Venugopal Rao Maddisetty, Chairman & Managing Director, Pace Digitek Limited, said:

"The commissioning of our additional 2.5 GWh manufacturing line builds on the progress we have made over the past year in building an integrated BESS business. During this period, we have strengthened our manufacturing capabilities, advanced localisation and enhanced execution across the value chain. With our installed manufacturing capacity now at 5 GWh, we can support our growing order book, project pipeline and product supplies while improving operational and cost efficiencies. We will continue investing in manufacturing, technology and product development to deliver reliable energy storage solutions to our customers."

About PACE Digitek Limited

Pace Digitek Limited (BSE: 544550, NSE: PACEDIGITK) is an integrated infrastructure and energy solutions company operating across the Energy and Telecom & ICT business segments. The Company operates across the value chain, spanning Manufacturing, Engineering, Procurement & Construction (EPC) and Operations & Maintenance (O&M) activities, supporting both project execution and product supply.

In the energy segment, the Company undertakes Battery Energy Storage System (BESS) design, manufacturing, system integration and deployment. Through its subsidiary, Lineage Power Private Limited, the Company manufactures energy storage systems and related power infrastructure products.

In the Telecom & ICT segment, the Company manufactures telecom power systems and delivers EPC and O&M services for telecom infrastructure, fibre networks and digital infrastructure projects across India.
