However, it has been observed that the participation by the public non-institutional shareholders/retail shareholders is at a negligible level.

Currently, there are multiple e-voting service providers (ESPs) providing e-voting facility to listed entities in India. This necessitates registration on various ESPs and maintenance of multiple user IDs and passwords by the shareholders.

In order to increase the efficiency of the voting process, pursuant to a public consultation, it has been decided to enable e-voting to **all the demat account holders, by way of a single login credential, through their demat accounts/ websites of Depositories/ Depository Participants**. Demat account holders would be able to cast their vote without having to register again with the ESPs, thereby, not only facilitating seamless authentication but also enhancing ease and convenience of participating in e-voting process.

Step-1: Access through Depositories CDSL/NSDL e-voting system in case of individual shareholders holding shares in demat mode.

- iv. In terms of SEBI circular no. SEBI/HO/CFD/CMD/CIR/P/2020/242 dated December 9, 2020 on e-Voting facility provided by Listed Companies, Individual shareholders holding securities in demat mode are allowed to vote through their demat account maintained with Depositories and Depository Participants. MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Global Economy

In CY 2025, the global economy grew by 3.4%. The global economy demonstrated steady but modest growth, supported by easing inflation, resilient labour markets, and gradual recovery in global trade. However, the pace of expansion remained uncertain amid ongoing geopolitical tensions, trade policy uncertainty, and uneven regional performance.

Indian Economy

India sustained its position as one of the fastest growing major economies in FY 2025-26, demonstrating resilience amid global uncertainties. Real GDP is estimated to grow by 7.7%, up from 7.1% in FY 2024-25, supported by robust domestic demand, sustained public investment, and stable macroeconomic fundamentals. Nominal GDP grew 8.9%, while Real and Nominal GVA expanded by 7.9% and 9.1% respectively. On the expenditure side, both Private Final Consumption Expenditure (PFCE) and Gross Fixed Capital Formation (GFCF) exhibited growth above 7.5%.

A favorable monsoon boosted agricultural output and rural demand, while manufacturing and construction continued gaining traction. The Primary sector grew 3.2%, driven mainly by agriculture and fishery, while the Secondary and Tertiary sectors grew 8.8% and 9.3% respectively at constant prices. Manufacturing, trade/ hotels/transport/communication and financial/real estate/professional services sectors all achieved double digit growth at both constant and current prices.

Growth was broad-based: trade, hotels, transport, and communication led at 11%, followed by financial, real estate, and professional services at 10.4%. Manufacturing grew 10.7% and construction 7.4%, reflecting improving industrial momentum, while agriculture registered moderate growth of 3%.

The Union Budget 2026-27 is anchored around the Viksit Bharat vision, prioritizing youth empowerment, structural reforms, and fiscal discipline. Growth is further supported by improved credit flow, higher capacity utilization, a good monsoon, and reforms such as GST 2.0. The budget's investment strategy targets strategic sectors – semiconductors, electronics, bio-pharma, and rare earths – to reduce import dependence and strengthen domestic capability. Infrastructure remains a central theme, with high capital expenditure directed towards freight corridors, waterways, and high-speed rail. MSMEs and the services sector receive focused support through funding access, IT reforms, skill development, and initiatives including medical tourism. Agriculture and energy security are addressed through productivity improvements, AI integration, and clean energy investments, all within a framework of fiscal prudence.

The RBI has held the repo rate steady at 5.25%, reflecting a balanced stance that supports economic momentum without compromising financial stability. This signals resilient domestic demand, supportive financial conditions, and a stable external sector – pointing to a cautiously optimistic outlook for the Indian economy in the year ahead.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matters	Auditor's Response
Evaluation of uncertain tax positions The Company operates in multiple jurisdictions and is subject to periodic challenges by local tax authorities on a range of tax matters during the normal course of business including direct and indirect tax matters. These involve significant management judgment to determine the possible outcome of the uncertain tax positions, consequently having an impact on related accounting and disclosures in the financial statements.	Our audit procedures include the following substantive procedures: • Obtained understanding of key uncertain tax positions; and • We along with our internal tax experts – - Read and analyzed select key correspondences, external legal opinions / consultations by management for key uncertain tax positions; - Discussed with appropriate senior management and evaluated management's underlying key assumptions in estimating the tax provisions; and - Assessed management's estimate of the possible outcome of the disputed cases

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Annual Report but does not include the financial statements and our auditor's report thereon. The Company's annual report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statement in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The amount of consideration to which the entity will be entitled may be less than the price stated in the contract if the consideration is variable because the entity may offer the customer a price concession.

Measurement

When (or as) a performance obligation is satisfied, company recognise as revenue the amount of the transaction price (which excludes estimates of variable consideration that are constrained) that is allocated to that performance obligation.

The transaction price is the amount that the entity expects to be entitled to in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties (for example, goods and service tax). The consideration promised may include fixed amounts, variable amounts, or both.

a. Sale of goods

Revenue is recognised upon transfer of control of promised goods to customers in an amount that reflects the consideration which the Company expects to receive in exchange for those goods. Revenue from the sale of goods is recognised at the point in time when control is transferred to the customer which is usually on dispatch / delivery of goods, based on contracts with the customers. Revenue is measured based on the transaction price, which is the consideration, adjusted for volume discounts, price concessions, incentives, and returns, if any, as specified in the contracts with the customers. Revenue excludes taxes collected from customers on behalf of the government. Due to the short nature of credit period given to customers, there is no financing component in the contract.

b. Sale of Services

Revenue from services rendered is recognised as the services are rendered and is booked based on agreements/arrangements with the concerned parties.

c. Interest and Dividend

Interest income is recognized on accrual basis using the effective interest method. Dividend income is recognised in profit or loss on the date on which the company's right to receive payment is established.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognised in statement of profit or loss.

b. Subsequent expenditure

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the company.

c. Depreciation

Depreciation on property, plant and equipment is provided using Written down value method (WDV) on depreciable amount as per the useful life of the assets in the manner as specified in Schedule II to the Companies Act, 2013. The estimated useful life of assets and estimated residual value is taken as prescribed under Schedule II to the Companies Act, 2013.

Depreciation on additions during the year is provided on pro rata basis with reference to date of addition/installation. Depreciation on assets disposed/discarded is charged up to the date on which such asset is sold.

The estimated useful lives, residual value and depreciation method are reviewed at the end of each balance sheet date, any changes therein are considered as changes in estimate and accordingly accounted for prospectively.

d. Capital Work In progress

Assets under erection/installation are shown as "Capital work in progress", Expenditure during construction period are shown as "pre-operative expenses" to be capitalized on erection/installations of the assets.

vii. Intangible Assets

Identifiable intangible assets are recognised when it is probable that future economic benefits attributed to the asset will flow to the Company and the cost of the asset can be reliably measured. Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss when the asset is derecognised.

Recognition and measurement

Computer software have finite useful life and are measured at cost less accumulated amortisation and any accumulated impairment losses.

Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates or where development stage is achieved. All other expenditure, including expenditure on internally generated goodwill and brands, when incurred is recognised in statement of profit or loss.

Amortisation

Amortisation is calculated to write off the cost of intangible assets less their estimated residual values using the straight-line method over their estimated useful lives and is generally recognised in statement of profit or loss. Computer software are amortised over their estimated useful life of 3 years.

Amortisation methods, useful lives and residual values are reviewed at each reporting date and adjusted, if required.

viii. Employee benefits

a. Short term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

b. Defined benefit plans

The company provides for gratuity to the employees as per the Payment of Gratuity Act, 1972. Employees who are in continuous for a period of five years are eligible for gratuity. The company has opted for scheme with Life Insurance corporation of India (LIC) to cover its liabilities towards employees gratuity. The company also carries out Actuarial Valuation of gratuity using the projected unit credit method as required by Ind AS – 19 and the difference between fair value of plan assets and liability as per actuarial valuation as at the year end is recognised in the financial statements.

Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements of the net defined benefit liability (asset) recognised in other comprehensive income shall not be reclassified to profit or loss in a subsequent period.

The Company recognises the following changes in the net defined benefit obligation as an expense in the statement of profit and loss:

- Service costs comprising current service costs, past-service costs; and
- Net interest expense or income

c. Other employee benefits

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognized as a liability at the present value of obligation as at the Balance sheet date determined based on an actuarial valuation.

d. Defined Contribution Plan

The company's payments to the defined contribution plans are recognized as expenses during the period in which the employees perform the services that payment covers. Defined contribution plan comprise of contribution to the employees' provident fund with government, Employees' State Insurance and Pension Scheme.

ix. Income Tax

Income tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to other comprehensive income or a business combination, or items recognised directly in equity.

a. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if, the Company:

- a) has a legally enforceable right to set off the recognised amounts; and
- b) intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

b. Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and liabilities are offset only if:

- a) the entity has a legally enforceable right to set off current tax assets against current tax liabilities; and
- b) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on the same taxable entity.

x. Foreign currency transactions

Transactions in foreign currencies are recorded at the exchange rates prevailing on the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Difference arising on settlement of monetary items are recognised in statement of profit and loss except to the extent of exchange differences which are regarded as an adjustment to interest costs on foreign currency borrowings that are directly attributable to the acquisition or construction of qualifying assets which are capitalized as cost of assets..

Non-monetary items that are measured based on historical cost in a foreign currency are recorded using the exchange rates at the date of the transaction. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Exchange difference arising out of these transactions are generally recognised in statement of profit and loss.

xi. Borrowing cost

Borrowing costs that are directly attributable to the acquisition, construction or production of qualifying asset are capitalised as part of the cost of that asset till the date it is ready for its intended use or sale. Qualifying asset are the assets that necessarily takes a substantial period of time to get ready for its intended use. All other borrowing costs are charged to the statement of profit and loss in the period in which they are incurred.

xii. Cash and Cash Equivalent

Cash and cash equivalent includes the cash and Cheques in hand, bank balances, demand deposits with bank and other short term, highly liquid investments with original maturity of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Bank overdraft are shown within borrowings in current liabilities in the balance sheet and forms part of financing activities in the cash flow statement. Book overdraft are shown within other financial liabilities in the balance sheet and forms part of operating activities in the cash flow statement.

xiii. Cash Flow Statement

Cash flows are reported using indirect method, whereby profit/ (loss) before tax is adjusted for the effect of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments and items of income or expenses associated with investing or financing cash flow. The cash flow from operating, investing and financing activities of the company is segregated based on the available information.

xiv. Earning Per Share

a. Basic earnings per shares is arrived at based on net profit / (loss) after tax available to equity shareholders divided by Weighted average number of equity shares, adjusted for bonus elements in equity shares issued during the year (if any) and excluding treasury shares.

b. Diluted earnings per shares is calculated by dividing Profit attributable to equity holders after tax divided by Weighted average number of shares considered for basic earning per shares including potential dilutive equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Potential ordinary shares shall be treated as dilutive when, and only when, their conversion to ordinary shares would decrease earnings per share or increase loss per share from continuing operations.

xv. Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognised when there is a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognized for future operating losses.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation, or the amount of the obligation cannot be measured with sufficient reliability. The Company does not recognize a contingent liability but discloses its existence in the financial statements

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Contingent assets are not recognized, but its existence is disclosed in the financial statements

xvi. Segment Accounting

The company has disclosed business segment as the primary segment. Based on the criteria mentioned in Ind AS 108 "Operating Segment" the company has identified its reportable segments. The Chief Operating Decision Maker (CODM) evaluates the company's performance and allocates resources based on an analysis of various performance indicators by operating segments. The CODM reviews revenue and gross profit as performance indicator for all of the operating segments. The various segment identified by the company comprised as under:

Name of Segment

LPG Cylinders - Manufacturing and repairing of LPG cylinders

Merchant Trading - Trading of various commodities, materials etc.

By products related to each segment have been included in respective segment.

Segment revenue, segment results, segment assets and segment liabilities include respective amounts directly identified with the segment and also an allocation on reasonable basis of amounts not directly identified. The expenses which are not directly relatable to the business segment are shown as unallocable corporate cost. Assets and liabilities that can not be allocated are shown as unallocable corporate assets and liabilities respectively.

xvii. Leases

Company as a lessor

At the inception of the lease the Company classifies each of its leases as either an operating lease or a finance lease. The Company recognises lease payments received under operating leases as income on a straight-line basis over the lease term. In case of a finance lease, finance income is recognised over the lease term based on a pattern reflecting a constant periodic rate of return on the lessor's net investment in the lease. If an arrangement contains lease and non-lease components, the Company applies Ind AS 115 Revenue from contracts with customers to allocate the consideration in the contract.

xviii. Impairment of Non-Financial Assets

The company assesses at each reporting date whether there is any objective evidence that a non-financial asset or a group of non-financial assets are impaired. If any such indication exists, the company estimates the amount of impairment loss.

For the purpose of assessing impairment, the smallest identifiable group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or group of assets is considered as cash generating unit.

An impairment loss is calculated as the difference between an asset's carrying amount and recoverable amount. Losses are recognized in statement of profit and loss and reflected in an allowance account. When the company considers that there are no realistic prospects of recovery of the asset, the relevant amounts are written off. If the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, then the previously recognized impairment loss is reversed through profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been in place had there been no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in Statement of Profit and Loss, taking into account the normal depreciation/amortization.

xix. Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial instruments also include derivative contracts such as foreign currency foreign exchange forward contracts, interest rate swaps and currency options; and embedded derivatives in the host contract.

a. Financial assets

Classification

The Company classifies financial assets in the following measurement categories :

- i. Those measured at amortised cost and
- ii. Those measured subsequently at fair value through other comprehensive income or fair value through profit or loss on the basis of its business model for managing the financial assets and the contractual cash flow characteristics of the financial asset.

Initial recognition and measurement

All financial assets are recognised initially at fair value. Transaction costs that are attributable to the acquisition of the financial asset are adjusted to the fair value, in the case of financial assets not recorded at fair value through profit or loss. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the company commits to purchase or sell the asset.

Measured at amortised cost

A financial asset is measured at the amortised cost if both the following conditions are met:

- a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the statement of profit and loss. The losses arising from impairment are recognised in the statement of profit and loss. This category generally applies to trade and other receivables.

Measured at fair value through other comprehensive income (FVOCI)

A financial asset is measured at FVOCI if both of the following criteria are met:

- a) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- b) The asset's contractual cash flows represent SPPI.

Financial assets included within the FVOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the company recognizes interest income, impairment

losses & reversals and foreign exchange gain or loss in the profit and loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to profit and loss. Interest earned whilst holding FVOCI debt instrument is reported as interest income using the EIR method.

Financial Asset at fair value through profit and loss (FVTPL)

FVTPL is a residual category for financial asset. Any financial asset, which does not meet the criteria for categorization as at amortized cost or as FVOCI, is classified as at FVTPL.

In addition, the group company may elect to classify a financial asset, which otherwise meets amortized cost or FVOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch').

Financial assets included within the FVTPL category are measured at fair value with all changes recognized in the profit and loss.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a company of similar financial assets) is primarily derecognised (i.e. removed from the company's balance sheet) when:

- The rights to receive cash flows from the asset have expired, or
- The company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the company has transferred substantially all the risks and rewards of the asset, or (b) the company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.
- When the company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the company continues to recognise the transferred asset to the extent of the company's continuing involvement. In that case, the company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the company has retained.
- Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the company could be required to repay.

Impairment of financial assets

In accordance with Ind-AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits, and bank balance.
- Trade receivables.

The Company follows 'simplified approach' for recognition of impairment loss allowance on:

- Trade receivables which do not contain a significant financing component.
The application of simplified approach recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.
- For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

b. Financial liabilities

Classification

The Company classifies all financial liabilities as subsequently measured at amortised cost, except for financial liabilities at fair value through profit or loss. Such liabilities, including derivatives that are liabilities, shall be subsequently measured at fair value.

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss or amortised costs.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The company's financial liabilities include trade and other payables, loans and borrowings, financial guarantee contracts and derivative financial instruments.

Financial liabilities at fair value through profit or loss.

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the group that are not designated as hedging instruments in hedge relationships as defined by Ind-AS 109. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognised in the profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in Ind-AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risk are recognized in OCI. These gains/loss are not subsequently transferred to P&L. However, the company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognised in the statement of profit or loss.

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

This category generally applies to interest-bearing loans and borrowings.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Derivative financial instruments

The company uses derivative financial instruments, such as forward currency contracts, interest rate swaps and forward commodity contracts, to hedge its foreign currency risks, interest rate risks and commodity price risks, respectively. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Offsetting

Financial assets and financial liabilities are offset and the net amount is presented in the balance sheet when, and when the company has a legally enforceable right to set off the amount and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

Measurement of fair values

The Company's accounting policies and disclosures require the measurement of fair values, for financial instruments.

The Company has an established control framework with respect to the measurement of fair values. The management regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the management assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of Ind AS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

C. Recent Accounting Pronouncement

The Ministry of Corporate Affairs notified new standards or amendment to existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. The Company applied following amendments for the first-time during the current year which are effective from April 1, 2025.

In August 2025, MCA notified the following amendments applicable w.e.f. April 1, 2025 to:

1. Ind AS 1, Presentation of Financial Statements, applicable

The amendment relates to classification of liabilities as current or noncurrent and non-current liabilities with covenants. In the context of classifying a liability as current, it removes the requirement of existence of a right to defer settlement for at least 12 months after the reporting date and instead requires that the said right should exist on the reporting date and have substance. The amendment also introduces guidance on classification of liabilities with covenants. The Company has no impact of these amendments in its classification criteria of current and non-current liabilities.

2. Ind AS 7, Statement of Cash Flows and Ind AS 107, Financial Instruments: Disclosures,

The amendment in Ind AS 7 requires to inform users of financial statements of the existence of supplier finance arrangements and explain the nature of the arrangements, the carrying amount of liabilities and the range of payment due dates. Ind AS 107 has been amended to add supplier finance arrangements as a factor that may cause concentration of liquidity risk. The Company has reviewed the amendment and based on its evaluation has determined that it does not have any impact in its financial statements.

3. Ind AS 12, International Tax Reform – Pillar Two Model Rules applicable immediately - The amendments provide a temporary mandatory relief from deferred tax accounting for top-up tax and disclose that they have applied the relief. This relief is immediate and applies retrospectively. Based on its evaluation has determined that it does not have any impact in its financial statements.

4. Ind AS 21 - The Effects of Changes in Foreign Exchange Rates - In May 2025, MCA notified amendments to Ind AS 21 - applicable w.e.f. April 1, 2025. The Company has reviewed the amendment and based on its evaluation has determined that it does not have any significant impact in its financial statements.

SARTHAK INDUSTRIES LIMITED**NOTES FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31st MARCH, 2026****VIII. Sensitivity Analysis**

Gratuity is a lump sum plan and the cost of providing these benefits is typically less sensitive to small changes in demographic assumptions. The key actuarial assumptions to which the benefit obligation results are particularly sensitive to are discount rate and future salary escalation rate. The following table summarizes the impact in percentage terms on the reported defined benefit obligation at the end of the reporting period arising on account of an increase or decrease in the reported assumption by 50 basis points.

(Amount ₹ in lacs)

Particulars	As at 31 st March, 2026		As at 31 st March, 2025	
	Decrease 50 bps	Increase 50 bps	Decrease 50 bps	Increase 50 bps
Change in discounting rate	15.29	14.59	13.46	12.79
Change in salary escalation rate	14.56	15.30	12.79	13.46

Inherent Risks

The plan is of a final salary defined benefit in nature which is sponsored by the Company and hence it underwrites all the risks pertaining to the plan. In particular, there is a risk for the Company that any adverse salary growth or demographic experience or inadequate returns on underlying plan assets can result in an increase in cost of providing these benefits to employees in future. Since the benefits are lump sum in nature the plan is not subject to any longevity risks.

(ii) Net defined benefit assets Rs. 7.93 Lacs being excess of fair value of planned assets over present value of funded defined benefit obligation presented under not no 8 other non current assets considering the nature and expected outcome of fund. Accordingly previous year's figure Rs. 6.06 lakhs has been regrouped from Note no 6 other non current financial assets to Note no 8 other non current assets.

(C) LEAVE ENCASHMENT

The liability in respect of leave encashment is determined using actuarial valuation carried out as at Balance Sheet date. Actuarial gain and losses are recognized in full in statement of Profit and Loss for the year in which they occur.
