Sub: JSW Energy commissions Halol Wind Blade Manufacturing Plant

Dear Madam / Sir,

This is to inform you that the Company has successfully commissioned its wind blade manufacturing plant at Halol, Gujarat, marking a significant step in vertically integrating its wind energy value chain and de-risking its supply chain.

The Press Release in this regard is attached.

Yours faithfully,

For **JSW Energy Limited**

Monica Chopra
Company Secretary

JSW Energy Commissions Halol Wind Blade Manufacturing Plant; Strengthens Wind Energy Supply Chain

Mumbai, India — June 8, 2026 – JSW Energy Limited ("the Company") today announced the commissioning of its wind blade manufacturing plant at Halol, Gujarat, marking a significant step in vertically integrating its wind energy value chain and de-risking its supply chain.

The Company currently operates an installed wind energy capacity of 3.9 GW. Further, the Company has 6.5 GW of locked-in hybrid capacity - in which wind is an integral component, and 2.4 GW of plain-vanilla locked-in wind projects, making it one of the largest wind power players in the country.

To support its future wind energy growth plans, the Company has commissioned a wind blade manufacturing facility at Halol, Gujarat, with another plant in advanced stages of commissioning at Chitradurga, Karnataka. The now fully commissioned Halol facility has an annual production capacity of up to 450 wind blades, equivalent to 600 MW of wind projects. The plant will manufacture 82-metre wind blades compatible with 4 MW Wind Turbine Generators.

This in-house manufacturing capability will enable the Company to de-risk its supply chain, support MNRE's domestic content requirements, and further optimize capital expenditure on wind energy projects by reducing logistics and other input costs, thereby enhancing the IRR profile of these projects. It also insulates the Company from input price fluctuations in wind blades.

Mr. Sharad Mahendra, Joint Managing Director and CEO of JSW Energy

"The commissioning of our Halol wind blade manufacturing plant is a defining milestone in our journey towards building a resilient and self-reliant renewable energy platform. By bringing critical manufacturing capabilities in-house, we are not only securing our supply chain against volatility but also enhancing the cost competitiveness and returns of our wind portfolio. This reinforces our commitment to delivering sustainable, long-term value for all our stakeholders as we accelerate towards our renewable growth ambitions."

JSW Energy has a total locked-in generation capacity of 32.1 GW, comprising 13.7 GW operational and 13.8 GW under construction across thermal, hydro, and renewables, with a pipeline of 4.6 GW. The company also has 29.6 GWh of locked-in energy storage capacity, comprising pumped hydro storage of 26.4 GWh and battery energy storage systems of 3.2 GWh. The company aims to reach 30 GW of generation capacity and 40 GWh of energy storage capacity by 2030, and to achieve carbon neutrality by 2050.

ABOUT JSW ENERGY: JSW Energy Ltd is one of the leading Private sector power producers in India and part of the USD 23 billion JSW Group which has significant presence in sectors such as steel, energy, infrastructure, cement, sports among others. JSW Energy Ltd has established its presence across the value chains of power sector with diversified assets in power generation, and transmission. With strong operations, robust corporate governance and prudent capital allocation strategies, JSW Energy continues to deliver sustainable growth, and create value for all stakeholders. JSW Energy began commercial operations in 2000, with the commissioning of its first 2x130 MW thermal power plants at Vijayanagar, Karnataka. Since then, the company has steadily enhanced its power generation capacity from 260 MW to 13.7 GW, ensuring diversity in geographic presence, fuel sources and power off-take arrangements. The Company is presently constructing various power projects to the tune of 13.8 GW, with a vision to achieve a total power generation capacity of 30 GW by 2030.

Forward Looking and Cautionary Statements:

Certain statements in this release concerning our future growth prospects are forward looking statements, which involve a number of risks, and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in earnings, our ability to manage growth, intense competition within Power Industry including those factors which may affect our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, our ability to manage our internal operations, reduced demand for Power, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which JSW Energy has made strategic investments, withdrawal of fiscal governmental incentives, political instability, legal restrictions on raising capital or acquiring companies outside India, unauthorized use of our intellectual property and general economic conditions affecting our industry. The company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the company.
