Subject: Press release

Dear Sir/Madam,

Please find enclosed the press release titled **"SoftTech Engineers Limited Secures ₹92.95 Crore JNPA Project for AI-Enabled Digital Twin and Integrated Command & Control Centre for Intelligent Port Operations"**.

Kindly take the same on record.

Thanking you,

Yours Sincerely,
FOR SOFTTECH ENGINEERS LIMITED

SOFTECH ENGINEERS LIMITED

SoftTech Engineers Limited, bags Rs. 92.95 Crores Project from JNPA for AI-Enabled Digital Twin and Command & Control Centre for Intelligent Port operations

Pune, 17th September, 2026

Overview:

SoftTech Engineers Limited has been awarded a Rs. 92.95 crores project by Jawaharlal Nehru Port Authority (JNPA) to design, build and operate an AI/ML-enabled, cyber-aware Digital Twin and Digital Twin Command & Control Centre (DTCCC) for the port. Digital Twin will give JNPA a single, real-time operational view of its Seaside, Landside and Road-traffic operations across the entire ~34 sq km port, enabling a smart and intelligent decision support system for the Authority.

First port-sector win for SoftTech – secured on the strength of its AECO sector expertise built over three decades

KEY HIGHLIGHTS

- **Project value:** Rs. 92.95 crores from Jawaharlal Nehru Port Authority (JNPA), India's largest container port.
- **Scope:** AI/ML-enabled, cyber-aware Active Digital Twin and 24x7 Command & Control Centre for operational efficiency covering the entire ~34 sq km port
- **Strategic significance:** SoftTech's breakthrough entry in the port and maritime sector, unlocking a scalable market opportunity for digital transformation in Infrastructure and Transport industry

Partnership: SoftTech is spearheading this opportunity leveraging globally recognized 3DEXPERIENCE platform by Dassault Systèmes

Anticipated outcomes for JNPA

The Digital Twin is designed to deliver measurable improvements: faster vessel turnaround and just-in-time arrivals on the seaside; a shared data platform across all five terminal operators, customs and rail that cuts cargo and container turnaround times on the land side; and shorter gate queues, decongested approach roads and end-to-end vehicle tracking on the road network – advancing JNPA's objectives of operational efficiency, sustainability, decarbonization, and safety and security. The platform is secure by design and built to scale as JNPA grows towards 10 million TEU capacity by 2027.

Why this matters for SoftTech

SoftTech's deep expertise in technology products and solutions in Architectural, Engineering, Constructions and Operations, AI/ML, geospatial platforms and large-scale government digitization, built since 1996 – enabled it to win a competitive process that included a live proof-of-concept. The mandate is significant on the counts that it is a large, multi-year engagement with the largest Port of the country opening doors for Digital Transformation projects of this size in Infrastructure sector introducing Active Digital Twin in India; it demonstrates SoftTech's evolution into an AI, Digital Twin and IoT-led technology company operating at the heart of India's critical infrastructure. **SoftTech will deliver the program in partnership with Dassault Systèmes, whose 3DEXPERIENCE City / Port platform** provides the core virtual-twin environment. SoftTech will lead solution design, AI/ML development, systems integration, the DTCCC build-out and long-term operations on the **CIVIT platform by SoftTech**. The project will enhance the capabilities of the CIVIT platform for digital transformation in Cities, Infrastructure, and Industries.

Management commentary

Mr. Vijay Gupta, Managing Director and Chairman, SoftTech Engineers Limited, said:

"JNPA is a critical gateway to India's economic growth, and securing this project is a significant landmark for SoftTech. This achievement reflects the strength of our Digital Twin and AI capabilities combined with our deep understanding of managing and transforming large-scale public infrastructure. We remain committed to driving technology-led innovation and delivering transformative solutions tailored to the construction, infrastructure, and transportation sectors."

About SoftTech Engineers Limited:

SoftTech Engineers Limited has been at the forefront of digitizing the architecture, engineering, construction and operations (AECO) industry since 1996. Headquarters in Pune, the company serves 1,500+ customers, with over 2 million building permits approved and more than 30 billion sq. ft. of built area managed through its platforms. Its flagship Civit Suite, an AI-driven, cloud-based suite spanning planning, permitting, infrastructure and construction management, is used by government agencies, urban local bodies, developers, Infrastructure and Industrial Development Corporations and enterprises across India and international markets, complemented by BIM, GIS and Digital Twin services.
