KALPATARU PROJECTS INTERNATIONAL LIMITED

PRESS RELEASE

KPIL Announces New Order Wins of ₹2,225 Crores

Mumbai | Tuesday, 13 October 2026: Kalpataru Projects International Limited (KPIL), a leading engineering and construction company in the power and infrastructure sector, has secured new orders / letter of comfort of approx. ₹ 2,031 Crores in the Power Transmission & Distribution (T&D) business in India and international markets. Additionally, Linjemontage i Grästorp AB (Sweden), a subsidiary of KPIL, has received an order worth approximately ₹194 crores (~SEK 200 Mn).

Manish Mohnot, MD & CEO, KPIL, said, " *We are pleased to announce new order wins in our T&D (Transmission & Distribution) business, which reflect a strong endorsement of our execution capabilities, technical expertise, and growing customer confidence. This sustained momentum in order inflows highlights the massive investments happening in transmission infrastructure, grid expansion, and renewable energy integration across India and global markets. Favourable industry tailwinds, paired with our end to end integrated EPC offerings in the T&D business, perfectly position us to sustain this growth going forward.*

We have secured orders valued at approx. ₹20,000 crore so far in the current fiscal year (YTD FY27), representing over 30% YoY growth and giving us strong confidence in achieving our targeted growth numbers."

PS: Enclosed press release for order by Linjemontage i Grästorp AB

KALPATARU PROJECTS INTERNATIONAL LIMITED

About Kalpataru Projects International Limited

Kalpataru Projects International Limited (KPIL) is one of the largest engineering, procurement, and construction (EPC) companies in the world, with a global footprint spanning 75 countries. KPIL offers integrated EPC solutions across diverse sectors, including power transmission and distribution, buildings and factories, water supply and treatment, railways, oil and gas infrastructure, urban mobility, highways, and airports. The company operates two manufacturing facilities in India for the fabrication of power transmission towers, heavy metal structures, and scaffolding and formwork systems. In FY2026, KPIL generated a revenue of ₹27,143 crores (~USD 2.9 billion), with more than 250 projects under execution across over 30 countries.

Linjemontage wins an order worth approximately SEK 200 million over three years from Ellevio

Linjemontage i Grästorp AB (publ) ("Linjemontage" or the "Company"), one of Sweden's leading pure-play EPC providers within power infrastructure, has won an order in a public procurement process by Ellevio AB for the refurbishment and expansion of an existing 130 kV substation in Repbäcken, Borlänge. The project will run over three years and has an estimated contract value of approximately SEK 200 million.

The project is being carried out to increase redundancy and capacity in the electricity grid. The project includes the construction of a new 130 kV substation within the expanded substation area, and connection of the new substation to the existing substation, which will remain operational throughout the construction works. At a later stage, Ellevio plans to connect four new overhead lines to the new substation as well as a new 400 kV bay, connecting to Svenska kraftnät's transmission grid.

"This is a strong reference project for Linjemontage and a clear testament to our expertise and experience with complex substation projects. Carrying out extensive new-build and refurbishment work in operational substation environments places high demand on planning, coordination and execution. With our extensive experience from substations in regional distribution networks and complex substation environments, we are well positioned for this type of project, and we would like to thank Ellevio for their continued trust," says Anders Åkerberg, CEO of Linjemontage.

The project will be delivered as a turnkey contract and includes foundation and civil works, a control building, control equipment, assembly and installation, as well as testing and commissioning.

The work is expected to commence immediately following contract signing and continue until final inspection, which is scheduled for 15 October 2029.
