Premier Energies Recognised as Grade A Manufacturer in Wood Mackenzie's Global Solar PV Module Manufacturer Ranking 2026

Hyderabad, June 4, 2026

Premier Energies Limited, one of India's leading integrated solar manufacturers, has been recognised among the Top 25 Global and Top 3 Indian Grade A Solar PV Module Manufacturers in Wood Mackenzie's Global Solar PV Module Manufacturer Ranking 2026.

This recognition underscores Premier Energies' growing global presence, manufacturing excellence, technological capabilities, and reliability as a trusted solar PV module supplier.

Wood Mackenzie assessed 48 module manufacturers across 10 countries, collectively accounting for 65% of global production capacity and 83% of global module shipments. Manufacturers were evaluated on a comprehensive set of criteria, including capacity utilisation, technology maturity, financial strength, supply chain resilience, ESG performance, product reliability, and research and development capabilities.

The Grade A classification serves as an independent benchmark for developers, procurement teams, and asset owners seeking dependable solar module suppliers.

Premier Energies currently operates 11.1 GW of annual solar PV module manufacturing capacity and is on track to expand its annual solar cell manufacturing capacity to 10.6 GW later this year. The company is also executing a ₹12,500 crore capital expenditure programme aimed at strengthening upstream solar manufacturing capabilities and diversifying into adjacent clean energy segments, including inverters, batteries, and transformers.

Commenting on the recognition, **Mr. Chiranjeev Saluja**, Managing Director, Premier Energies Limited, said:

"Being recognised as a Grade A solar PV module manufacturer by Wood Mackenzie is a significant validation of Premier Energies' manufacturing excellence, technological leadership, and long-term reliability as a solar partner. As global customers increasingly assess suppliers based on quality, scale, financial strength, ESG performance, and supply chain resilience, this recognition reinforces our commitment to building a globally competitive, fully integrated solar manufacturing platform from India."

Premier Energies' inclusion among the world's leading Grade A module manufacturers further strengthens its position as a globally competitive Indian solar company and reflects India's growing prominence in the global renewable energy manufacturing landscape.

About Premier Energies Limited

Premier Energies Limited is one of India's largest integrated solar module manufacturers and a publicly listed company with over 30 years of industry experience. The company is

recognised for its commitment to technology innovation, sustainability, operational excellence, and an employee-centric culture. Premier Energies has also been certified as a Great Place to Work® for five consecutive years.
