WABAG Consortium secures a “Large” Order towards Ajman Sewage Biorefinery Plant, Strengthening GCC presence

Chennai, June 09, 2026: VA TECH WABAG (“WABAG”), a leading pure-play Multinational Water Technology Group, has secured the Design & Build contract for the proposed Ajman Sewage Biorefinery Plant – Phase 3 in the United Arab Emirates from Ajman Sewerage (Private) Company Limited. The project will be executed through a consortium arrangement, with WABAG serving as the consortium leader.

The project which is scheduled to be executed over a 24-month period includes the design, engineering, procurement, and construction of a 60 MLD Sewage Treatment Plant, along with inlet works, primary and secondary treatment systems, and comprehensive sludge management facilities comprising digesters, gas holders, scrubbers, and power generation systems. The scope also includes odor control systems and disc filters to ensure compliance with the guaranteed treated effluent quality. The plant will incorporate advanced mechanical and biological treatment processes based on the Activated Sludge Process (ASP), along with tertiary treatment through disc filtration systems.

This order marks WABAG’s strategic entry into the UAE and further reinforces our position as a trusted partner in delivering sustainable and innovative Wastewater management solutions across the GCC region. This breakthrough significantly strengthens WABAG’s presence within the regional water ecosystem and enhances our credentials to pursue larger and more complex opportunities across the Middle East.

Commenting on this development, Mr. Rohan Mittal, Head – Strategy and Business Growth – GCC, said " *This project marks our strategic entry into the UAE market and represents an important milestone in our Middle East growth journey, a region we have identified as a key growth engine for the future. Beyond expanding our geographic footprint, this project reinforces our ability to compete and succeed in one of the world’s most dynamic and strategically important water infrastructure markets. The UAE’s sharp focus on water security, sustainability, and infrastructure resilience creates a strong long-term opportunity landscape, and this win positions us well to participate meaningfully in the region’s next phase of growth.*"

About WABAG: With over a century of expertise, WABAG stands as a global leader in water technology, delivering innovative and sustainable solutions for both municipal and industrial needs. As a pure-play Indian Water Technology Multinational, WABAG provides end-to-end water solutions tailored to diverse requirements across the world. Powered by more than 2,000 water professionals operating in 25+ countries, WABAG positively impacts millions of lives every day. Over the past three decades, the company has designed and built 1,500+ water and wastewater treatment plants globally, earning its reputation as a trusted lifecycle partner. WABAG manages every phase of the water value chain — from design, engineering, supply, and construction to installation, commissioning, and long-term operations across multiple business models. Driven by a strong culture of innovation, WABAG operates cutting-edge R&D centres in Europe and India and holds 125+ intellectual property rights. Its vision aligns with the United Nations Sustainable Development Goals and core ESG principles, with an emphasis on conservation, resource optimisation, recycling, and reuse. As one of the world's foremost partners in water sustainability, WABAG continues to transform global water challenges into opportunities for a more resilient and sustainable future.

Annexure-I

a)	Name of the entity awarding the order(s)/ contract(s)	Ajman Sewerage (Private) Company Limited
b)	Significant terms and conditions of order(s)/ contract(s) awarded in brief	Design, engineering, procurement, and construction of a 60 MLD Sewage Treatment Plant, along with inlet works, primary and secondary treatment systems, and comprehensive sludge management facilities comprising digesters, gas holders, scrubbers, and power generation systems
c)	Whether order(s) / contract(s) have been awarded by domestic/ international entity	International entity
d)	Nature of order(s) / contract(s)	Design & Build contract for the proposed Ajman Sewage Biorefinery Plant – Phase 3 in the United Arab Emirates from Ajman Sewerage (Private) Company Limited
e)	Whether domestic or international	International Project
f)	Time period by which the order(s)/ contract(s) is to be executed	The project is scheduled to be completed within 24 months.
g)	Broad consideration or size of the order(s)/ contract(s)	Large Order*
h)	Whether the promoter/ promoter group / group companies have any interest in the entity that awarded the order(s)/ contract(s)? If yes, nature of interest and details thereof	No
i)	Whether the order(s)/ contract(s) would fall within related party transactions? If yes, whether the same is done at arm's length	No

**Note: A 'Large' international order shall mean an order value in the range of USD 30 to 75 Million.*
