WABAG wins ‘Large’ Order towards expansion of the Donauinsel Water Works in Vienna, Austria

Chennai, July 01, 2026: VA TECH WABAG (‘WABAG’), a leading pure-play multinational water technology group, has been awarded a ‘Large’ Order by the City of Vienna, Municipal Department MA 31 – Wiener Wasser, for the expansion of the Donauinsel Water Works in Vienna, Austria. With this project, WABAG further strengthens its position as a leading full-service provider for complex infrastructure in drinking water and wastewater treatment. The project highlights WABAG’s ability to deliver integrated, climate-resilient water technology solutions for major public utilities and reinforces its role as a reliable partner for sustainable water management. The overall facility is scheduled for completion and commissioning in 2030, followed by acceptance milestones. For WABAG, the project represents a flagship reference in Austria and underlines the Group’s strategic focus on Europe.

WABAG will be responsible for the complete technology package of the new water works, covering process engineering, electrical engineering, instrumentation and control, as well as building services. The new facility will be equipped with a modern multi-barrier treatment process including oxidation, ozonation, advanced oxidation, filtration, activated carbon filtration and UV disinfection.

The project is one of Vienna’s most important drinking water infrastructure investments in decades and forms a central part of the City of Vienna’s “Wiener Wasser 2050” strategy. With a design capacity of up to 1,000 litres per second, equivalent to approximately 86 MLD, the new water works will make a significant contribution to securing Vienna’s long-term drinking water supply. The expansion of the Donauinsel Water Works will strengthen the resilience of Vienna’s drinking water system by adding a controllable groundwater-based supply pillar alongside the city’s renowned alpine spring water supply. The plant will treat groundwater from protected well fields and feed high-quality drinking water into Vienna’s water supply network. In doing so, the project will support the city’s growing population, increasing peak demand and the challenges arising from climate change.

Commenting on this order win, Mahmut Gedek, CEO - Europe Cluster, said, *"We are pleased to have secured this important project in Austria. The expansion of the Donauinsel Water Works is a landmark project for Vienna’s long-term drinking water supply and a strong validation of WABAG’s technological expertise. After delivering numerous international projects, we are proud to bring our know-how directly to Vienna and contribute to the city’s water security for the decades ahead."*

Order Classification	Small	Medium	Large	Major	Mega
Domestic (in INR Crores)	Upto 100	100 to 250	250 to 600	600 to 1,000	Above 1,000
International (In USD Millions)	Upto 10	10 to 30	30 to 75	75 to 150	Above 150

About WABAG: With over a century of expertise, WABAG stands as a global leader in water technology, delivering innovative and sustainable solutions for both municipal and industrial needs. As a pure-play Indian Water Technology Multinational, WABAG provides end-to-end water solutions tailored to diverse requirements across the world. Powered by more than 2,000 water professionals operating in 25+ countries, WABAG positively impacts millions of lives every day. Over the past three decades, the company has designed and built 1,500+ water and wastewater treatment plants globally, earning its reputation as a trusted lifecycle partner. WABAG manages every phase of the water value chain — from design, engineering, supply, and construction to installation, commissioning, and long-term operations across multiple business models. Driven by a strong culture of innovation, WABAG operates cutting-edge R&D centres in Europe and India and holds 125+ intellectual property rights. Its vision aligns with the United Nations Sustainable Development Goals and core ESG principles, with an emphasis on conservation, resource optimisation, recycling, and reuse. As one of the world's foremost partners in water sustainability, WABAG continues to transform global water challenges into opportunities for a more resilient and sustainable future.

Annexure-I

a)	Name of the entity awarding the order(s)/ contract(s)	City of Vienna, Municipal Department MA 31 – Wiener Wasser
b)	Significant terms and conditions of order(s)/ contract(s) awarded in brief	Complete technology package towards the expansion of the Donauinsel Water Works in Vienna, Austria
c)	Whether order(s) / contract(s) have been awarded by domestic/ international entity	International entity
d)	Nature of order(s) / contract(s)	Complete technology package covering process engineering, electrical engineering, instrumentation and control, as well as building services
e)	Whether domestic or international	International Project
f)	Time period by which the order(s)/ contract(s) is to be executed	Completion and commissioning in 2030, followed by acceptance milestones
g)	Broad consideration or size of the order(s)/ contract(s)	Large Order*
h)	Whether the promoter/ promoter group / group companies have any interest in the entity that awarded the order(s)/ contract(s)? If yes, nature of interest and details thereof	No
i)	Whether the order(s)/ contract(s) would fall within related party transactions? If yes, whether the same is done at arm's length	No

**Note: A 'Large' international order means an order having a value of USD 30 to 75 million.*
