PRESS RELEASE

Monarch Surveyors Wins ₹48.10 Crore West Central Railway Mandate to Help Shape India's Expanding Rail Network

Pune, October 21, 2026: Monarch Surveyors and Engineering Consultants Limited (BSE: 544453), a leading infrastructure consulting and engineering services company, has received a Letter of Acceptance (LoA) from West Central Railway for an assignment valued at **₹48.10 crore**. The Company will conduct Final Location Surveys (FLS) and provide associated engineering and planning services for railway infrastructure development projects.

The mandate places Monarch at an important stage of India's railway development journey—where precise surveys, robust investigations and well-considered planning translate into safer, faster and more resilient rail corridors. Beyond FLS, Monarch's scope includes preparation of the Detailed Project Report (DPR), geotechnical investigations, signaling, electrical and operating/traffic works for the construction of electrified new lines, doubling, third and fourth lines, as well as flyover and bypass-line works.

The assignment will support the planning and development of railway infrastructure designed to increase network capacity, strengthen connectivity and enable the continued expansion of India's rail transportation system. The project is subject to requisite approvals from the relevant government authorities and is scheduled for completion within 36 months from the date of issuance of the LoA.

The order further deepens Monarch's presence in railway infrastructure consultancy and reflects the Company's integrated capabilities across surveying, engineering, technical investigations and project planning. It also reinforces Monarch's ability to bring multidisciplinary expertise to complex, nationally significant transportation projects.

Commenting on the development, **Mr. Sunil Kokare**, Director – Business, Monarch Surveyors and Engineering Consultants Limited, said: "We are pleased to receive this order from West Central Railway, which marks another meaningful milestone for Monarch. It adds further strength to our order book and reflects the expanding opportunities for our expertise in railway infrastructure consultancy. Every rail corridor begins with clarity—of alignment, ground conditions and engineering intent—and we are proud to contribute that foundation to projects of national importance."

Mr. Santosh Desai, Technical Director – Transportation, added: "With India's continued focus on railway network expansion, modernisation and improved connectivity, we see strong long-term opportunities in the sector. Our teams will combine technical rigour with practical delivery experience to support West Central Railway's infrastructure goals. We remain committed to delivering quality-driven engineering solutions that contribute to the nation's infrastructure development and create enduring value for our stakeholders."

About Monarch

Founded in 1999, Monarch Surveyors and Engineering Consultants Ltd. is a publicly listed leader in infrastructure, driving transformative projects across railways, roads, urban development and industrial corridors. The Company provides comprehensive infrastructure consulting services, including DPRs, urban development, land acquisition planning, geospatial mapping using LiDAR and 3D scanning, detailed engineering design and project management services.
