**Subject: 12 Copper-Gold Prospect Areas Identified and Airborne Geophysical Survey Completed in JV Company in Oman**

Dear Sir/Madam,

South West Pinnacle Exploration Ltd (SWPE), a coal and non- coal mineral Exploration cum mining company with presence on pan India basis, is pleased to provide an update on exploration progress within a 1400 km<sup>2</sup> Block 22B Mineral Concession, Sultanate of Oman, held through the Company's joint venture company Al Hadeetha Mining LLC (AHML). AHML has held the concession since the concession agreement was signed in January 2025, and subsequently ratified by Royal Decree in March 2025.

In the JV company AHML, SWPE is having three partners namely Alara Oman operations Pty Ltd (a 100% subsidiary of Alara Resources Ltd, Australia) and two Omani Companies namely, Al Tasnim Mining LLC and Al Hadeeda Investment services LLC.

**Key Highlights are as below:**

- a) 12 copper-gold prospect areas identified across Block and the adjoining licence area. The newly generated prospects are now subject to further geological mapping and rock-chip sampling.
- b) HeliTEM airborne electromagnetic and magnetic survey completed with 6,132 line-km flown across around 1400 km<sup>2</sup> mining block , interpretation report expected by Q-2 of FY 27.
- c) Systematic rock-chip sampling at certain prospects has returned peak natural copper values of 22,681 ppm Cu (2.27% Cu) associated with visible malachite mineralisation.
- d) Elevated copper values also returned in opportunistic, reconnaissance-level rock-chip sampling collected during concession-wide traversing at several other prospects. No prospect has yet been ranked.
- e) Field verification is complete at designated corridor, with equivalent work planned across the remaining prospects ahead of a staged follow-up exploration programme.

## Strategic Context:

SWPE continues to progress systematic, staged exploration activities in Oman in partnership with Alara and two local stakeholders, consistent with its strategy of responsibly exploring prospective mineral concessions and building a robust pipeline of exploration and development assets alongside imparting mining and exploration services through another JV in Oman.

Looking at present international demand supply scenario of copper, the present update is a very important achievement for timely development of such a large copper - Gold mining block.

This is for your information and records.

Thanking you.
