ANNEXURE-I

ASMS and Ampivo to Expand Digital Agriculture and Farmer Services Across Rural India

National, 24th September 2026:

Avio Smart Market Stack Limited (ASMS), formerly Bartronics India Limited, and **Ampivo Smart Technologies** are set to deepen their collaboration following the **MoU** between the companies, with plans to **introduce Ampivo's digital agriculture platform "Agri Kisan Setu" across identified villages within ASMS' rural network.**

Ampivo has independently developed and launched its agriculture application, **Agri Kisan Setu**, available on the Google Play Store in seven languages. The platform is already being used in villages where Ampivo is conducting farmer trainings and pilot programmes, enabling the company to gather on-ground feedback and continuously refine its technology, content and service workflows.

As part of its broader expansion strategy, Ampivo is working with FPOs, NGOs, institutions and other ecosystem partners across India to extend its digital agriculture platform to a larger farmer base. The proposed collaboration with ASMS is an important part of this expansion, providing an opportunity to introduce the platform across ASMS' established rural network.

Ampivo's platform supports agri enterprises with farmers, agri-entrepreneurs, and rural stakeholders by providing access to modern farm tools, farm management assistance, agricultural commodity-wise market information, and bringing together key agricultural services through a unified digital interface, including market price discovery, buyer and seller connectivity, agricultural knowledge and tutorials, government-scheme information, and specialised services such as drone services to improve farm productivity, decision-making, supply chain efficiency, and streamline farm operations, reduce costs, and enhance farm income.

The platform is also being developed to support carbon credits and digital Measurement, Reporting and Verification (DMRV), with the objective of enabling farmers to participate in eligible sustainability and carbon reduction-linked programmes. Ampivo is also developing digital workflows to help farmers find government schemes and entitlements relevant to their location, profile, and agricultural activities.

N. Vidhya Sagar Reddy, Managing Director, Avio Smart Market Stack Limited, said: "ASMS is focused on building an ecosystem that connects rural communities with markets, technology, financial services and new economic opportunities. Ampivo has developed and deployed a live digital agriculture platform, and we see an opportunity to extend these capabilities across our network villages. Together, ASMS' rural reach and Ampivo's technology can provide farmers with easier access to agricultural information, services, markets and emerging sustainability opportunities."

AVIO SMART MARKET STACK LIMITED

(Formerly known as Bartronics India Limited)

Anupam Shah, Chief Operating Officer, Ampivo Smart Technologies, said: “Ampivo has progressed from technology development to live deployment, with our application available on the Google Play Store and being used through our pilot programmes. Our multilingual and configurable platform is designed to adapt to different geographies, crops and farmer requirements. We are now expanding through partnerships with FPOs, NGOs and institutions across India, and ASMS provides an important opportunity to take Ampivo to a much larger rural ecosystem.”

The collaboration is expected to initially focus on introducing Ampivo across identified ASMS network villages and on-boarding farmers to the platform’s existing agricultural, knowledge and marketplace services. The companies will subsequently evaluate deeper integration with ASMS’ agriculture initiatives, including digital advisory, service delivery and eligible sustainability and carbon-credit programmes.

About Avio Smart Market Stack Limited

Avio Smart Market Stack Limited (ASMS) is a diversified platform company focused on building scalable businesses across Financial Inclusion & Digital Services, Agri Supply Chain & Technologies, and Diagnostics & Healthcare. Through its Financial Inclusion division, the Company has established a strong presence across rural India, creating a trusted distribution network. Building on this foundation, ASMS is developing a technology-enabled agri ecosystem while leveraging its existing reach. The Company has also entered into a strategic partnership with a cutting-edge molecular diagnostics company to diversify into the high-growth healthcare and diagnostics sector.

About Ampivo Smart Technologies

Ampivo Smart Technologies is a technology company developing digital platforms that connect farmers with agricultural information, markets, services and institutional ecosystems. Its multilingual agriculture application is live on the Google Play Store and is being piloted across rural markets. Ampivo is expanding its farmer ecosystem through collaborations with FPOs, NGOs, institutions and other partners across India.
