### Capital Efficiency

Strong capital efficiency reflected in FY26 revenue of Rs 149 crore supported by a low fixed asset base of ~INR 5.29 crore; minimal depreciation (~1.06% of revenue) and low store capex (~INR 50 lakh vs. INR 1-2 crore for peers) drive high asset turnover and superior capital productivity.

### Store Economics Advantage

Franchisee-funded inventory (FOFO stores) significantly reduces working capital requirements, enabling faster store rollout with minimal balance sheet strain, resulting in lower upfront investment, quicker payback periods, superior unit economics, improved ROCE, and scalable expansion across Tier 1, Tier 2, and emerging markets.

### Competitive Advantage

Delivering superior margins versus peers through a low capital intensity model, disciplined inventory management, and optimized marketing spend; enabling rapid and scalable expansion; supported by strong brand legacy, this drives high profitability, robust cash flows, efficient capital allocation, and sustainable long-term value creation.

# Q4 & FY26 Performance

“ Our revenue for FY26 stood at Rs 149 crore, supported by strong profitability, with EBITDA margins of 27% and PAT margins of 21%, reflecting disciplined execution and operational efficiency.

As of FY26, our retail network expanded to **126 touchpoints, comprising 38 Exclusive Brand Outlets (EBOs), 34 Shop-in-Shop (SIS) locations with P. N. Gadgil & Sons Ltd. , and 54 SIS formats across Shoppers Stop and other third-party partners.**

We continue to strengthen our pan-India presence through a multi-format strategy encompassing FOCO-led expansion, SIS channels, and strategic retail partnerships. This positions us as a fast-growing, profitable, and capital-efficient player, underpinned by strong unit economics and a disciplined growth approach.

As the Indian fashion jewellery market is currently estimated at ~INR 10,000 crore and is expected to grow to ~INR 30,000 crore by 2030. The organized segment remains underpenetrated at less than 10%, presenting a significant opportunity for growth. While pricing remains important, increasing consumer awareness around quality, design, and sustainability is driving a gradual shift toward organized players.

Within the segment, silver jewellery is growing at a CAGR of ~4–6%, while costume jewellery is witnessing stronger growth of ~11.5%, largely driven by Gen Z adoption.

We also remain committed to maintaining high standards of corporate governance through consistent and transparent disclosures. This includes detailed quarterly results, explanatory notes, and standardized reporting formats comparable to mainboard-listed companies. We appreciate your continued support and confidence in our journey.
