Dear Sir/Madam,

Sub: Submission of "Earnings Presentation Q2/H1 - FY 27" under Regulation 30 of SEBI (LODR), 2015

With reference to the captioned subject matter, please find herewith attached an "Earnings Presentation Q2/H1- FY 27" prepared by the Company for the general awareness of its shareholders comprising of Company's Overview, Business Overview, Financial Overview etc. This presentation has also been uploaded on the Company's website.

Kindly take above on record for doing needful in the matter.

Thanking you,

Yours faithfully,
For **Supreme Petrochem Ltd**

SUPREME PETROCHEM LIMITED

EARNINGS PRESENTATION

Q2/H1-FY27

India's first truly international scale state-of-art Styrenics complex at Amdoshi

Market Leader in Polystyrene and Expanded Polystyrene with market share exceeding 50%

India's first and only plant of Extruded Polystyrene Insulation Foam Board (XPS)

Internationally reputed supplier of quality Styrenics products

Strong balance sheet, debt free & meeting all capital expenditure through internal sources

Zero liquid discharge at both plants

About 50% of power consumed is met from renewable sources

FY26
RONW: 14%;
ROCE: 21%

In association with several NGO's SPL is promoting extensively "Re-cycling of Post-Consumer Expandable Polystyrene" and applications thereof.

Long-term rating maintained at AA-/Stable by CRISIL (outlook revised to Stable) & India Rating; short-term rating remains A1+

Company Overview

Company Overview

- SPL was formed as joint venture between The Supreme Industries Ltd. and the well diversified Rajan Raheja Group.
- SPL has two manufacturing locations - village Amdoshi, Taluka Roha, Maharashtra and Manali New Town, Chennai, Tamil Nadu.
- Amdoshi Maharashtra complex has an installed capacity to produce 540,000 TPA of various polymers consisting of Polystyrene, Expandable Polystyrene, Acrylonitrile Butadiene Styrene (ABS), Compounds of Polymers and Extruded Polystyrene.
- SPL's plant at Manali New Town, produces EPS with installed capacity of 33,000 TPA.
- As a policy, SPL has setup a 12.5 MW solar power plant in joint venture with Tata Renewable Energy Ltd. This along with rooftop solar power plant has helped to reduce its reliance on conventional energy sources by about 50%.
- Company's subsidiary M/S Xmold Polymers Pvt Ltd, is a specialised Tier II supplier of engineering thermoplastic compounds, strategically located at SIPCOT, Gummidipoondi near Chennai/ Sri City in Andhra Pradesh with annual installed capacity at 15,000 TPA.

Manufacturing Locations - Amdoshi

Amdoshi Wangani Village near Nagothane in Raigad, Maharashtra

Amdoshi plant:

- State-of-the-art manufacturing facility across 337 acres complex at Amdoshi, with Infrastructure geared to handle up to a million tonnes of polymers.
- Site located 110 km south of Mumbai on the national highway to Goa with proximity to JNPT / Mumbai Port.

Installed capacity:

- Polystyrene – 300,000 TPA (Technology – Huntsman Chemical Corp, USA through ABB Lummus Crest)
- Expandable polystyrene – 115,000 TPA
- Speciality Compounds – 50,000 TPA
- Extruded polystyrene – 72,000 m3 PA
- mABS – 70,000 TPA (Technology - Versalis, Italy)

Manufacturing Locations - New Manali Town

New Manali Town near Chennai in Tamil Nadu

Manali plant: EPS

- State-of-the-art manufacturing facility spread over 15 acres at Manali New Town near Chennai.
- Installed capacity: 33,000 TPA
- Technology – Shinho Petrochemicals, Korea

Business Overview

Polystyrene: GPPS and HIPS

- SPL manufactures several grades of both General-Purpose Polystyrene (GPPS) and High Impact Polystyrene (HIPS) for injection moulding, extrusion, thermoforming and blow moulding applications.
- Offer various combinations of toughness, transparency, heat distortion, temperature and flow behavior.
- **Capacity: 3,00,000 MTPA**
- State of the Art Laboratory for Quality Control and Development
- Undisputed leader of Polystyrene in India

Expandable Polystyrene (EPS)

- Expandable polystyrene (EPS) is spherical polystyrene beads impregnated with pentane as a blowing agent.
- EPS provides cost effective protective packaging solutions and energy-efficient insulation.
- SPL produces different types of EPS like Fast Cycle (FC) grades, High expansion/ low energy (BL) grades, self-extinguishable (flame retardant) etc.
- **Largest capacity at single location in India at Amdoshi – 115,000 TPA**

Acrylonitrile Butadiene Styrene (ABS)

- **Continuous mass ABS plant of 70,000 MTPA**, with Technology from Versalis S.p.A., Italy commissioned in September 2025.
- With its clean and distinctive technology, SPL offers presently Natural ABS, Extrusion ABS, Color ABS & Compounds of ABS.

Key Product features include

- Low volatile organic chemicals (odour-free)
- Excellent white base colour
- Low gel content
- Superior lot to lot consistency
- Better Thermal stability

Specialty Polymers & Compounds (SPC)

- **Installed Operating Capacity : 50,000 MTPA**
- Capable of making PS / ABS / PP compounds, Engineering Plastics and Masterbatches
- Full-fledged SPC Laboratory for Development activities

Extruded Polystyrene (XPS)

- Installed Capacity : 72,000 m³
- Plant revamped to phase out use of CFC & HCFC and to make use of HFC & CO2 as blowing agents to reduce impact on environment
- GRIHA (Green Rating for Integrated Habitat Assessment) Certified Product
- Green Pro Certification by CII Green Products and Services Council

Our Products: GPPS and HIPS

APPLICATIONS

General Purpose Polystyrene (GPPS)

GPPS is one of the most widely used transparent polymers suitable for injection molding and extrusion applications.

- Properties:**
- a) Excellent processability and good dimensional stability
 - b) Very high clarity and aesthetics
 - c) FDA Compliant – Non-Toxic

Applications: Components in consumer durables like Refrigerators, Stationery, Writing Instruments, Rigid Sheets, Medical Disposables, Beads, bangles and Household Items.

High Impact Polystyrene (HIPS)

HIPS is a tough plastic that has excellent impact strength, high stiffness and excellent moldability but opaque.

Properties: Excellent processability, wide processing window, well-balanced mechanical properties and high flexural strength are some of its key properties.

Applications: Consumer durables like Refrigerators cabinets/ components, Air conditioners, cooler bodies, toys, computer accessories, food packaging, dairy packaging.

APPLICATIONS

Our Products: Expandable Polystyrene (EPS)

EPS is solid beads of Polystyrene impregnated with Pentane gas. When processed, these beads expand and fuse to become foam called “Thermocol”.

Properties:

It is a lightweight material with good insulation characteristics and cushioning properties.

Applications:

Widely used in packaging consumer durables, Fish and Fruit packaging and in construction for energy-efficient insulation including Cold Storages. EPS can be molded into any shape and are used in helmets, Infant car seats, 3D Panels for construction and Geofoam for Road building.

APPLICATIONS

Acrylonitrile Butadiene Styrene (ABS)

- Acrylonitrile Butadiene Styrene (mass ABS) is an opaque engineering plastic with uses in automotive sheet and components, e-scooters, Small Electrical Devices, Appliances like - Juicer, Mixer, Grinders, RO/Water purifiers, Air Coolers, refrigerators and Consumer items such as Toys, Helmets, clocks, automobile Batteries, Medical equipment, Bathroom Fittings, etc.
- ABS provides good impact strength. It offers a high degree of surface quality and exhibits good chemical resistance properties.

A FIRST OF ITS KIND Continuous Production Process for ABS in India, with following benefits -

• ATRIBUTES •

- Better Lot-to-lot Consistency
- Lower Base Colour & More Efficient Coloring
- Better UV Stability
- Better Thermal Stability
- Lower Gels
- Lower VOC's (Volatile Organic Compounds)
- Higher Melt Strength

• BENEFITS •

- Less ScrapLess
- Pigment Requirement
- Improved UV Absorption
- Lower Regrinding
- Improved Surface Quality
- Less Odour (Vehicles , Car Interiors)
- Improved Thermoforming

ABS APPLICATIONS

Our Products: Compounds & Masterbatches

APPLICATIONS

Compounds

These are ready to use grades wherein specific / custom stated properties are introduced into the polymer, such as resistance to fire & UV light, toughened / impact modified, low shrinkage, improved load bearing capacity & high heat resistance

Applications:

Appliances including small Kitchen appliances, Air conditioners, Washing Machine, TV, Water heaters, Water purifiers, Electrical switch accessories, Automotive & Industrial Battery.

Masterbatches

These are concentrates of colourants, speciality minerals and performance additives which are used for enhancing specific characteristics of polymers, as demanded by the end application.

Applications:

Packaging, Pipes & Films, Automotive parts, Electrical switch accessories, Kitchenware, Tableware, Gift, Toys & Stationary, etc.

APPLICATIONS

Our Products: Extruded Polystyrene (XPS) INSU board

The XPS thermal insulation board is a rigid foam board having a closed cell structure produced in a fully automated continuous extrusion process.

Properties:

High compressive strength, higher R value and low water absorption makes it an ideal insulating material for wall, roofs and floors.

Applications:

Main applications are Insulation of Commercial & Residential buildings for energy conservation – An important product for combating climate change and reduction in emission of CO_2 . Other applications are in refrigerated vehicles, vaccine boxes and medicine packing boxes, tunnel linings etc.

Caring for Community & Environment

Caring for Community

Education

- Construction of School Building at Amdoshi Village
- 107 Digital Classrooms & 03 Computer laboratories for schools
- 48 Anganwadies in nearby villages
- Technical Training of nearby village students
- Scholarships for students pursuing higher technical education

Health & Hygiene

- Drinking water supply scheme
- Construction of Primary Health Centre at Wagani Village
- 270 Toilets provided in nearby villages
- Public Toilet provided in Nagothane Town
- 84 Public Toilets provided for 20 villages

Active community care has created a good image of the Company ensuring uninterrupted operations.

Caring for Environment

- Adoption of Cleaner and Environmentally Sound Production Technologies

- About 50% of the combined electrical energy requirement at both location is met through Solar Power.

- Rain-water harvesting of 3000 cubic meters

- About 79,000 trees planted in the green belt around the complex

- Use of Cleaner fuel

- Natural Gas for Heaters & Boilers

- Effluent treatment with ZLD:

- Full fledged tertiary effluent treatment facility with Zero Liquid Discharge is installed at both locations

Zero-Waste Celebration for Bappa Ganesh-Utsav 2026

SUPREME PETROCHEM LTD

Financial Overview

Q2/H1-FY27 Operational Highlights

- Total sales volume of manufactured products in Q1FY27 at 95,242 MT is up by 24.0% on YoY basis and by 34.7% on QoQ basis. However, total sales volume at 1,66,085 MT in H1FY27 is lower by 2.8% on Y-o-Y basis due to lower export volumes.
- Styrene prices continue to be volatile in the quarter under report.
- With duty free imports of polymers allowed till July 15, 2026 by Government of India, large volumes of PS and ABS were imported from ASEAN countries and China which put pressure on local selling prices in the first two months of Q2FY27.
- With no supplies from Gulf region, Company continues to explore and establish alternate supply sources, for all its imported raw materials.
- Due to significant increase in ocean freight rates, long voyage time, price volatility and limited availability of main raw material – Styrene, export volumes were considerably lower on Y-O-Y basis.
- New line of wide width XPS Insulation Board with capacity of 150,000 M3 and expansion of Compounding capacity from 50,000 TPA to 80,000 TPA are making progress as planned.
- SPL remains debt free with investable surplus of INR 886 crores at the end of September 2026 and all capital expenditure is being met from internal cash accruals

Projects Under Implementation at Amdoshi Plant

Rs. 900 crores

Estimated total cost of the above projects, to be funded from internal accruals

Planned schedule for completion · MTA = metric tonnes per annum

Quantities Sold in MT

Sales quantity is net of PS and mABS 7,049 MT in Q2 FY27 (1,849 MT in Q2 FY26) and 11,711 MT in H1 FY27 (4,354 MT in H1 FY26) transfer to SPC for compounding and to XPS for insulation boards.
