## **Transrail Lighting Secures New Orders Worth ₹412 Crore**

*Orders come mainly from reconductoring of Transmission Lines using HTLS conductors manufactured by the Company.*

**Mumbai, October 06, 2026** – Transrail Lighting Limited (BSE: 544317, NSE: TRANSRAILL), one of the leading Engineering, Procurement, and Construction (EPC) players in the Transmission & Distribution (T&D) sector, today announced that it has secured new orders worth ₹412 crore in its core Transmission & Distribution (T&D) business. Post these new orders, the order intake for the year has grown to ₹2,021 crore. The Company has further L1 orders totalling to ₹409 crore.

The order wins mainly includes projects in domestic market for transmission line reconductoring through HTLS conductors. These additional reconductoring orders apart from the ones the Company declared few days back, will help Transrail to cater to such new types of projects where the high-performance carbon core HTLS conductors which are manufactured inhouse, are used to increase the current carrying capacity of the Transmission lines.

With the increased manufacturing capacities (Tower 184,400 MTPA and Conductor 40,800 KMPA) and the tailwinds associated with the T&D sector in both domestic and international markets, the Company is well aligned for profitable growth.

**Mr. Randeep Narang, MD & CEO, stated,**

*"I am happy to successively announce new order wins worth ₹412 crore, which further helps to increase our orderbook and reinforce our position as an integrated T&D player. With this we further expand our domestic footprint in transmission line reconductoring projects using high-performance carbon-core HTLS conductors manufactured by us.*

*We are motivated to see the Government's thrust for the sector by approving Phase-III of the Green Energy Corridor which will strengthen India's power infrastructure to support the evacuation of 900 GW of non-fossil fuel-based generation. Industry tailwinds like this coupled with our enhanced manufacturing capacities for towers and conductors, makes us well placed to continue our growth and create sustainable value."*
