For Coforge Limited

**Barkha Sharma
Company Secretary & Compliance Officer**

Encl.: As above

Coforge to Host Executive Briefing on Operationalizing Enterprise Autonomy

Coforge will demonstrate how to bridge the AI execution gap through data enablement, agentic operations, and forward-deployed engineers

Princeton, NJ, USA | Greater Noida, India | September 15, 2026 – Coforge Limited (NSE: COFORGE), a global AI-native engineering services leader, today announced it will host a virtual briefing for analysts and investors entitled **"Operationalizing Enterprise Autonomy,"** on September 17, 2026 from 9:00–10:30 a.m. EDT (6:30–8:00 p.m. IST).

This invitation-only, 90-minute session will explore the technologies, operating models, and execution frameworks required for global enterprises to move beyond AI experimentation to deliver measurable business outcomes at scale.

The executive briefing builds on Coforge's broader vision for **enterprise autonomy**, which focuses on enabling AI systems to make increasingly autonomous, context-aware decisions across enterprise data, systems, processes, and policies. The discussion will demonstrate how organizations can operationalize that vision through a combination of data foundations, infrastructure modernization, agentic operations, and outcome-based delivery models.

The executive briefing will feature presentations from Coforge executives and business leaders and will conclude with live Q&A session.

Attendance is by invitation only. Analysts, investors and other qualified attendees may request an invitation by contacting investors@coforge.com.

About Coforge

Coforge is an AI-native engineering services leader, where AI is the foundation of how we design, build, and deliver intelligent solutions for our clients. We use AI and hyperspecialized industry expertise to engineer autonomous enterprises. We combine AI agents with our AI-enabled workforce, including specialized FDEs in hybrid pod-based delivery units. With a deep focus on trusted AI, our solutions are secure, governed, and enterprise-grade. We are outcome-led by design. Moving beyond AI experimentation, we deliver measurable business outcomes—including lower operating costs, faster cycle times, higher conversion rates, and sustained margin growth.
