PRESS RELEASE – FOR IMMEDIATE RELEASE

Premier Energies Inaugurates India’s Next-Generation Solar Module Manufacturing Facility at Seetharampur | Performs groundbreaking ceremony for its 6 GWh BESS facility and 18,000 MT per annum aluminium frames facility

Hyderabad, 9 July 2026

Premier Energies Limited’s new 5.6 GW solar module manufacturing facility at Seetharampur in Rangareddy, Telangana was inaugurated today by Shri A. Revanth Reddy, Hon’ble Chief Minister of Telangana, in the presence of Shri Mallu Bhatti Vikramarka, Hon’ble Deputy Chief Minister and Finance Minister, Government of Telangana, and Shri Duddilla Sridhar Babu, Hon’ble Minister for Information Technology, Electronics and Communications, Industries and Commerce, and Legislative Affairs, Government of Telangana.

The company also performed a ground-breaking ceremony for its 6 GWh Battery Energy Storage System (BESS) facility and 18,000 metric tonnes per annum aluminium frames facility. The Seetharampur manufacturing campus, spread across 75 acres, is the newest addition to the Premier Energies manufacturing business.

With commissioning of the new plant, Premier Energies module manufacturing capacity has reached 11.1 GW, strengthening the company’s ability to serve domestic and international markets. The new facility houses advanced G12R TOPCon module manufacturing lines, India’s first Zero Bus Bar manufacturing unit, AGV-enabled material movement and AI-powered quality inspection systems. The automated production lines are capable of manufacturing one solar module every four seconds while maintaining precision, consistency and quality at scale.

The ground-breaking of the 6 GWh BESS and the 18,000 MT per annum aluminium frames plants marks the company’s expansion into allied clean-energy and manufacturing segments. These projects are expected to strengthen the company’s supply chain and contribute to India’s goal of building a self-reliant clean-energy ecosystem. Once fully operational, the Seetharampur facility is expected to create 3000+ jobs empowering local communities and support a more diverse workforce. The facility has been designed with sustainability integrated into its operations, reflecting Premier Energies commitment to responsible growth.

Speaking at the occasion, **Mr. Surender Pal Singh Saluja**, Chairman, Premier Energies, said: “Inauguration of the Seetharampur facility is a proud milestone in Premier Energies’ 30-year journey. What began as a vision in 1995 has grown into one of India’s leading integrated solar manufacturing platforms. This facility reflects our commitment to technology, manufacturing excellence and India’s clean-energy future.”

Mr. Sudhir Reddy, Director, Premier Energies, said: “The Seetharampur facility represents an important step in Premier Energies’ strategy to build a more integrated, technology-led clean-energy manufacturing platform. Along with the upcoming BESS and aluminium frames facilities, this campus strengthens our ability to serve evolving customer requirements, enhance supply-chain resilience and support India’s transition towards a self-reliant clean-energy future.”

About Premier Energies Limited

Premier Energies Limited is a publicly listed company and one of India’s leading integrated solar manufacturers. With three decades of solar manufacturing expertise, the company manufactures high-efficiency solar cells and modules and is expanding its presence across the clean-energy value chain.

Premier Energies is undertaking a significant capital expenditure programme to expand solar manufacturing capacity, strengthen backward integration into ingots and wafers, and diversify into areas such as battery energy storage systems, inverters, transformers and aluminium components.

The company remains committed to technology innovation, sustainable manufacturing and supporting India’s transition towards a secure and self-reliant clean-energy future.
