Remsons Automotive UK Nominated for 10-Year Pedal Box Programme by Global Commercial Vehicle OEM

Landmark nomination valued at ₹160 Crores over programme life; SOP scheduled for Q2 2028

MUMBAI — 8th May, 2026 — Remsons Automotive Ltd, (UK), the United Kingdom Step Down subsidiary of Remsons Industries Limited, has been nominated by a global commercial vehicle OEM for a **10-year pedal box programme**, with start of production scheduled for **Q4 of 2028**. The nomination carries an estimated lifetime value of approximately **₹160 Crores** over the programme term, making it another large nomination in the Group.

The nomination is a significant milestone for the entire Remsons Group, materially expanding the Company's commercial vehicle order book and deepening its position as a Tier-1 system supplier to global truck and bus manufacturers. The pedal box programme moves Remsons further up the value chain from individual components to integrated, safety-critical sub-assemblies, and reinforces the strategic role of the UK subsidiary as the Group's gateway to European OEM business.

A pedal box is a structural, safety-critical assembly that integrates the brake and (where applicable) clutch pedals into a single mounted unit fitted to the vehicle's bulkhead. The award follows an extended technical evaluation and competitive sourcing process in which Remsons was assessed on engineering capability, manufacturing readiness, quality systems, programme management and total landed cost over the ten-year programme life.

“This nomination is a landmark moment for the Remsons Group. Securing a ten-year pedal box programme of this scale with a global commercial vehicle OEM validates the engineering depth, manufacturing capability and quality systems that we have built across our Indian and UK operations. It is a defining win for the entire Group and provides clear, multi-year revenue visibility into the next decade.”

— Davinder Bains, MD, Remsons Automotive Ltd.

With SOP scheduled for Q4 2028, programme tooling, validation and capacity planning will be progressed across the Group's UK and India operations over the next several quarters. The programme is expected to ramp to full series volumes thereafter and contribute to revenue across the contracted ten-year horizon.

ABOUT REMSONS INDUSTRIES LIMITED

Remsons Industries Limited is a publicly listed Indian engineering company specialising in the design and manufacture of mechanical control cables, gear shifters, pedal assemblies, sensors, lighting systems and allied automotive components for passenger vehicles, commercial vehicles, two-wheelers and off-highway applications. With manufacturing operations in India and the United Kingdom, the Company supplies leading global and domestic OEMs and operates from a five-decade engineering heritage. Remsons is listed on the BSE and NSE.
