PRESS RELEASE

Servotech Renewable Secures 900 kW Hybrid Solar Rooftop with BESS Project from UPSRLM, Rural Development Department, Govt. of UP

New Delhi/Uttar Pradesh, 16th July, 2026: Servotech Renewable Power System Ltd. (NSE: SERVOTECH), India's leading solar solutions brand, has secured an order from the **UPSRLM, Department of Rural Development**, Government of Uttar Pradesh for the installation of **Hybrid Solar Rooftop System with Battery Energy Storage System** across multiple locations in Uttar Pradesh.

Under the project, Servotech has been allocated 12 locations of 75 kW each with a total allocated capacity of **900 kW**. Under the scope of the project, Servotech Renewable will be responsible for the design, supply, installation, commissioning, and Maintenance of Hybrid solar systems with BESS across the locations. The hybrid solar systems, integrated with battery energy storage, are designed to provide reliable and uninterrupted clean energy while reducing dependence on conventional power sources.

The project aligns with the state's continued focus on decentralised renewable energy adoption and is expected to strengthen energy access across rural communities by promoting sustainable and resilient power infrastructure.

Commenting on the development, **Sarika Bhatia, Whole-Time Director, Servotech Renewable Power System Ltd.**, said, "We are excited to work with the UPSRLM on this initiative. Reliable access to clean energy has the potential to transform rural communities, and we are proud to contribute to that vision through our hybrid solar solutions. This project reflects our commitment to delivering sustainable energy infrastructure that empowers communities while supporting state's transition towards renewable energy excellence and accelerating the adoption of solar power across the country."

Disclaimer:

This press release contains "forward-looking statements" — that is, statements related to future, not past, events. In this context, forward-looking statements often address our expected future business and financial performance, and often contain words such as "expects," "anticipates," "intends," "plans," "believes," "seeks," "should" or "will." Forward-looking statements by their nature address matters that are, to different degrees, uncertain. For us, uncertainties arise from the behaviour of the renewable energy, electronics, and EV infrastructure industries; from the integration and performance of our subsidiaries and joint ventures; and from numerous other matters of national, regional, and global scale, including those of a political, economic, business, competitive, or regulatory nature. These uncertainties may cause our actual future results to be materially different from those expressed in our forward-looking statements. We do not undertake to update our forward-looking statements.
