New Delhi, November 5, 2026 — Cosmo Ferrites Limited (BSE: 523100), a leading manufacturer and exporter of Soft Ferrites and wire-wound magnetic components, today announced its unaudited financial results for the second quarter ended September 30, 2026 (Q2 FY27).

Quarterly Overview

Revenue and EBITDA increased during the quarter compared to the same quarter last year, on the back of higher volumes and realisations in both the domestic and export markets. The revenue and profitability could have been higher but for disruptions on the sea route that delayed raw material shipments and raised raw material and logistics costs. Higher realisations helped offset a significant part of this impact.

Market & Capacity Expansion

The Company continues to focus on the EV and solar sectors within its magnetics business and added a new customer during the quarter.

New Powder Development

Cosmo developed and commercialised several new powders for EV, automotive, telecommunications and solar applications. These powders offer lower power loss, higher saturation flux density, higher permeability and improved frequency response.
