Subject: Press Release

Dear Sir/Madam,

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we are sending herewith a copy of the Press Release titled “**L&T Technology Services Launches AgenticIQ™, an End-to-End Agentic AI Platform for Engineering, Manufacturing and Customer Experience**” which is self-explanatory.

This is for your information and records.

Thanking You,

Yours sincerely,

For L&T Technology Services Limited

Prasad Shanbhag
Company Secretary & Compliance Officer
(M. No. A 30254)

Encl.: As above

L&T Technology Services Launches AgenticIQ™, an End-to-End Agentic AI Platform for Engineering, Manufacturing and Customer Experience

Highlights:

- Purpose-built to help organizations scale autonomous, domain-aware AI agents from pilots to production
- Lays the foundation for LTTS' next-generation Engineering Intelligence solutions and Agentic-led engineering delivery

Bengaluru, August 11, 2026: L&T Technology Services (BSE: 540115, NSE: LTTS), a global leader in Engineering Intelligence Solutions & ER&D Consulting Services, today announced the launch of **AgenticIQ™**, an end-to-end Agentic AI platform purpose-built for engineering and manufacturing organizations. Designed to help enterprises move beyond isolated AI pilots, AgenticIQ™ enables autonomous, multi-agent workflows across engineering, product development, manufacturing, industrial operations and customer experience, accelerating the adoption of Engineering Intelligence at scale.

As enterprises increase investments in AI, many initiatives continue to struggle to move beyond proof-of-concepts into production. Disconnected engineering systems, manual processes and highly regulated environments often prevent organizations from scaling autonomous AI while maintaining governance, security and operational reliability.

Built on LTTS' portfolio of Engineering Intelligence solutions, AgenticIQ™ transforms proven engineering capabilities into specialized, reusable AI agents through a planning-first architecture that is embedded directly into engineering and production workflows and designed to operate within enterprise governance boundaries. The platform helps safeguard critical data, intellectual property and regulatory compliance while laying the foundation for LTTS' next-generation Engineering Intelligence solutions and an Agentic-led engineering delivery model, enabling faster development and deployment of AI-powered solutions.

Designed for customer-centric engineering and R&D-intensive environments, AgenticIQ™ supports industries including automotive, industrial manufacturing, medical devices and healthcare, semiconductor, plant engineering and high-tech. Its cloud-agnostic architecture enables organizations to build once and deploy anywhere across cloud and on-premises environments, helping enterprises scale trusted AI while retaining control of proprietary engineering knowledge, workflows and intellectual property.

Amit Chadha, Chief Executive Officer & Managing Director, L&T Technology Services, said, “The next phase of Engineering Intelligence will be defined by how effectively autonomous AI agents collaborate to solve complex industry challenges across engineering, production and customer experience. Over the years, LTTS has built AI-powered engineering solutions that address domain-specific business problems across industries. With AgenticIQ™, we are transforming these proven capabilities into reusable AI agents on a unified Agentic AI platform that enables enterprises to rapidly build, orchestrate and deploy next-generation agentic solutions at scale.”

About L&T Technology Services Ltd

L&T Technology Services (LTTS) is a global leader in Engineering Intelligence Solutions & ER&D Consulting Services. A listed subsidiary of Larsen & Toubro (L&T), we offer design, development, testing, and sustenance services across products and processes. Purposeful. Agile. Innovation. is how we drive growth across the Mobility, Sustainability and Tech segments. Our customer base includes 69 Fortune 500 companies and 57 top ER&D companies across industrial products, medical devices, transportation, telecom & hi-tech, and process industries. Headquartered in India, we have over 23,840 employees across 21 global design centers, 30 global sales offices, and 103 innovation labs, as of June 30, 2026.
