Hyderabad, September 10, 2026 Edvenswa Enterprises Limited Enters into Strategic MoU with Armour1X LLP for Collaboration in AI, Cybersecurity and Deep Technologies

Edvenswa Enterprises Limited has entered into a Memorandum of Understanding (MoU) with Armour1X LLP, Hyderabad, to establish a strategic, non-exclusive collaboration framework focused on Artificial Intelligence (AI), Generative AI, Cybersecurity, Cyber-Physical Security, IoT, Intelligent Automation and other Deep Technologies.

Under the proposed collaboration, the parties intend to jointly identify and develop technology use cases, undertake Proofs-of-Concept (PoCs), design and deliver workforce training and capability-building programmes, and develop integrated technology solutions for enterprise, government and institutional customers.

Edvenswa will leverage its capabilities in digital transformation, application engineering, cloud technologies, AI, cybersecurity, IoT, systems integration and managed services to support solution engineering, implementation and technology delivery.

Armour1X will contribute its deep-technology expertise, AI/GenAI and cybersecurity capabilities, specialist technology platforms and solutions, technology ecosystem and strategic market relationships.

The collaboration will also explore joint go-to-market initiatives, technology evaluation, solution development, implementation and deployment, with an initial focus on enabling workforce capabilities and building talent in AI, cybersecurity and emerging deep-technology domains.

The parties intend to pursue opportunities in India and, where mutually agreed, international markets, through jointly developed solutions, platforms, training programmes and technology-enabled services.

The MoU provides a framework for exploring and pursuing mutually beneficial opportunities and does not, by itself, create any fixed revenue commitment, investment obligation, equity arrangement, minimum purchase obligation or guaranteed business volume for either party. Specific commercial, technical and operational terms will be mutually agreed and documented separately for individual projects, engagements or opportunities.

The collaboration is intended to combine Edvenswa's technology delivery and digital transformation capabilities with Armour1X's deep-technology, AI, cybersecurity and emerging-technology strengths, creating opportunities to develop and deliver innovative solutions and build technology capabilities for customers in India and global markets.
