## Omnitech Engineering Expands into Data Centre Infrastructure Value Chain; Commences Receiving Commercial Orders Following Successful First Article Approval

Rajkot, Gujarat, India | 21 October 2026, Wednesday

### Key Highlights:

- Commercial orders commenced following successful First Article (FA) approval by the customer;
- Precision-engineered components and sub-assemblies for the data centre infrastructure value chain;
- Strategic milestone marks the successful transition from product development and customer qualification to commercial orders

Omnitech Engineering Limited (“**Omnitech**” or “the **Company**”) is pleased to announce that it has commenced receiving commercial orders for the manufacturing and supply of precision-engineered components and sub-assemblies serving the data centre infrastructure value chain, following successful First Article (FA) approval by its customer.

First Article approval is a customer’s formal confirmation that a manufactured component meets the specified design, dimensional and quality requirements, and is a key step before commercial production. Its successful completion marks Omnitech’s progression from product development and customer qualification to commercial order execution.

The development reinforces Omnitech’s ability to leverage its established capabilities in precision machining, engineered fabrication and assembly to address the evolving requirements of advanced digital infrastructure.

Commenting on the development, Mr. Udaykumar Arunkumar Parekh, Chairman & Managing Director, said:

*“The rapid growth of AI, cloud computing and high-performance computing is creating new opportunities in advanced data centre infrastructure. Our progression from First Article approval to commercial orders reflects our commitment to extending Omnitech’s precision engineering capabilities into emerging, high-growth industries such as Data Centre.”*

The Company considers the data centre infrastructure value chain an important strategic growth vertical, complementing its established industrial businesses and supporting its long-term objective of building a diversified, technology-oriented precision engineering enterprise.

Omnitech remains focused on disciplined execution, consistent quality and long-term customer partnerships.

---

## About Omnitech Engineering Limited

Omnitech Engineering Limited, Registered Office situated at Rajkot, India, is manufacturer of highly engineered precision machined components and assemblies that are majorly utilized towards safety critical applications. Established in FY2007, the Company is supplying to global customers in Energy, Motion Control & Automation, Industrial Equipment Systems and Other diversified Industrial applications. ## Confidentiality

Customer identity, order quantities and values, product specifications and commercial terms are confidential and, in keeping with the Company's contractual confidentiality and non-disclosure obligations, have not been disclosed in this press release. The Company will not disclose such information except to the extent required by applicable law, regulation or stock exchange requirements.

## Safe Harbour Statement

This press release has been prepared by Omnitech Engineering Limited (the "Company") solely for information purposes. It does not constitute an offer, recommendation or invitation to purchase or subscribe for any securities of the Company, and shall not form the basis of, or be relied upon in connection with, any contract or binding commitment whatsoever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company.

This press release has been prepared based on information and data which the Company considers reliable; however, the Company makes no representation or warranty, express or implied, as to the truth, accuracy, completeness, fairness or reasonableness of its contents, and no reliance should be placed on it. It may not be all-inclusive and may not contain all information that a reader may consider material. Any liability in respect of the contents of, or any omission from, this press release is expressly excluded.

Certain statements in this press release regarding the Company's business prospects, growth strategy and market opportunity (including opportunities arising from growth in AI, cloud and high-performance computing, and the expected volume and continuity of orders following First Article approval) are forward-looking statements. Such statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and assumptions that are difficult to predict. These include, but are not limited to, the performance of the Indian and global economies, the performance of the industries in which the Company operates, competition, government policies and procurement priorities, customer requirements, approvals and order timing, technological changes, supply-chain conditions, the Company's ability to successfully implement its strategy and execute orders, its future levels of growth and expansion, and changes in revenue, income or cash flows. Actual results, levels of activity, performance or achievements may differ materially and adversely from those expressed or implied in this press release.

The Company assumes no obligation to update any forward-looking information contained in this press release, except as required by applicable law. Any forward-looking statements or projections made by third parties and included herein are not adopted by the Company, and the Company is not responsible for such third-party statements or projections. Nothing in this press release should be construed as a commitment or assurance of future revenue, profitability or business performance.
