Dear Sir / Madam,

**Sub: Press Release titled “AWL Agri Business Limited backs expansion of regenerative Mustard Programme after demonstration farms delivers up to 30% higher yields”.**

Please find attached copy of press release dated 9<sup>th</sup> July 2026 titled “AWL Agri Business Limited backs expansion of regenerative Mustard Programme after demonstration farms delivers up to 30% higher yields”.

Kindly take the same on records.

Thanking You

Yours faithfully,

**For AWL Agri Business Limited  
(formerly known as Adani Wilmar Limited)**

**Darshil Lakhia  
Company Secretary  
Memb. No: A20217**

## **AWL Agri Business Backs Expansion of Regenerative Mustard Programme After Demonstration Farms Deliver Up to 30% Higher Yields**

*The first phase of the SEA-led initiative covered 3,000 demonstration plots across Rajasthan, Madhya Pradesh and Haryana, showcasing the potential of regenerative agriculture to improve productivity, strengthen soil health and enhance farmer incomes.*

*The programme will expand during 2026–27 with over 400 groundnut and soybean model farms and more than 3,000 regenerative mustard model farms across three states.*

**Ahmedabad, 9 July 2026:** AWL Agri Business Limited, one of India's leading food and FMCG companies, has welcomed the encouraging results of the Solvent Extractors' Association of India's (SEA) Regenerative Mustard Model Farm Programme, which delivered mustard yield improvements of up to 30 per cent across demonstration farms in Rajasthan, Haryana and Madhya Pradesh during the 2025–26 Rabi season.

AWL participated in the initiative as the lead sponsor in partnership with Bunge India, Louis Dreyfus India, Godrej Agrovet, VVF India, JR Agro Industries and Arihant Solvex, while Solidaridad Network Asia served as the programme's implementation partner.

The programme demonstrates how regenerative agriculture can improve farm productivity while promoting healthier soils, efficient input use and better farm economics. At a time when India imports nearly 55–60 per cent of its edible oil requirements, improving domestic oilseed productivity has become a national priority. The encouraging results reinforce the potential of regenerative farming practices to strengthen India's edible oil value chain while enhancing farmer livelihoods.

Commenting on the programme's outcomes, **Shrikant Kanhere, Managing Director and Chief Executive Officer, AWL Agri Business Limited, said,** *“India's journey towards edible oil self-reliance begins with improving productivity at the farm level. The encouraging results of this programme demonstrate that regenerative agriculture can help farmers produce more while improving soil health and using inputs more efficiently. Collaborative initiatives like these create a scalable model that can strengthen farmer incomes, build climate resilience and contribute meaningfully to India's long-term food and nutrition security.”*

Launched in 2019, the SEA-led Regenerative Mustard Model Farm Programme currently spans 3,000 Front Line Demonstration (FLD) plots across 14 districts in Rajasthan, Madhya Pradesh and Haryana. Implemented by SEA, the programme works directly with lead farmers to demonstrate regenerative and climate-resilient agricultural practices, including improved soil health management, balanced nutrient use and sustainable cultivation techniques. It is also supported by 27 Farmer Field Schools (FFS), enabling farmers to exchange knowledge and accelerate the adoption of best practices across local communities.

The programme delivered significant improvements in productivity and farm economics across all three participating states. In **Rajasthan, 1,320 demonstration plots** across Baran, Bundi, Kota, Jhalawar and Tonk districts **recorded a 30 per cent increase** in mustard yields, rising **from 1,853 kilograms per hectare to 2,409 kilograms per hectare**, while the benefit-cost ratio improved from 2.6 to 4.0. In Haryana, 100 demonstration plots across Rewari and Mahendragarh districts achieved a similar 30 per cent increase in yields, from 1,900 kilograms per hectare to 2,470 kilograms per hectare, with the benefit-cost ratio improving from 3.5 to 4.8. In Madhya Pradesh, 1,580 demonstration plots across Mandsaur, Neemuch, Ratlam, Shajapur, Agar Malwa, Vidisha and Raisen districts recorded a 20.5 per cent increase in yields, from 1,900 kilograms per hectare to 2,295 kilograms per hectare, while the benefit-cost ratio improved from 2.5 to 3.1.

Building on the success of the first phase, SEA, in collaboration with Solidaridad Network Asia and industry partners, plans to significantly expand the programme during the 2026–27 crop cycle. The next phase will establish more than 400 regenerative groundnut and soybean model farms during the Kharif season and over 3,000 regenerative rape-mustard model farms during the Rabi season across Rajasthan, Madhya Pradesh and Haryana.

The expansion aligns with the Government of India's National Mission on Edible Oils–Oilseeds (NMEO-OS), which aims to enhance domestic oilseed production through higher farm productivity, sustainable agricultural practices and reduced dependence on edible oil imports.

As one of India's leading food and FMCG companies with deep linkages across the agricultural value chain, AWL Agri Business remains committed to supporting science-based initiatives that strengthen agricultural resilience, promote sustainable farming practices and create long-term value for farming communities. The company will continue working with industry partners to advance India's edible oil ecosystem and contribute to the nation's long-term goal of edible oil self-reliance.

### **About AWL Agri Business Ltd. (formerly known as Adani Wilmar Ltd.)**

AWL Agri Business Ltd. (formerly Adani Wilmar Limited) is one of India's largest Food & FMCG companies, offering a diverse portfolio of essential kitchen staples, including edible oils, wheat flour, rice, pulses, and sugar. AWL through its brands, including flagship brand - Fortune, commands the trust of more than 135 million households, reaching to every 1 in 3 Indian families. With more than 80 manufacturing facilities across 11 states, including India's largest single-location refinery in Mundra (5,000 tons per day capacity), AWL ensures seamless production and distribution across the country. Its extensive supply chain, supported by 98 stock points, over 10,000 distributors and sub-distributors, along with a retail network of 2.6 million outlets, guarantees widespread accessibility across urban and rural India.

Beyond serving retail consumers, AWL also caters the HoReCa and institutional consumers, with staple food products, specialized bakery and Lauric fats, Castor Oil derivatives, Oleochemicals, and value-added Soya products. Its advanced castor oil facilities produce pharmaceutical-grade, and low-moisture castor oil, catering to global markets. Additionally, AWL has expanded into the Home & Personal Care (HPC) segment, offering soaps, handwashes, and multipurpose cleaners, further strengthening its product offerings.
