Mamata Machinery has been granted a patent in India for its invention titled "Pouch Shuttle Mechanism for Horizontal Form Fill Seal (HFFS) Machine"

Ahmedabad, India – August 14, 2026: Mamata Machinery Limited ('Mamata' or 'the Company'), a leading machinery solution provider in the flexible packaging industry, today announced that it has been granted a patent by the Indian Patent Office for its invention titled "Pouch Shuttle Mechanism for Horizontal Form Fill Seal Machine". The patent has been granted under Patent No. 599268, with the grant recorded on August 14, 2026. This proprietary technology enables the efficient transfer of the package to the filling station within Mamata's horizontal form fill seal (HFFS) machines.

With this patent secured, Mamata strengthens the protection for a technology built into its HFFS machines, reinforcing its position as a technology-driven player in the flexible packaging machinery sector.

About the Company:

Mamata Machinery Limited is a leading global provider of total flexible packaging machinery solutions, offering a comprehensive range of products across the value-chain, from co-extrusion to converting and advanced packaging machinery. With over 35 years of industry experience, Mamata has established itself as a trusted engineering enterprise, boasting more than 5,400 machine installations in 80 countries worldwide. The Company is renowned for its consistent innovation and numerous industry-first product introductions, delivering cutting-edge solutions that address the evolving needs of the flexible packaging sector. Mamata's commitment to technology, quality, and customer-centric design has made it a preferred partner for businesses seeking reliable and efficient flexible packaging solutions on a global scale.
