Dear Sir/ Madam,

Sub: Glenmark Expands Global Respiratory Innovation Footprint with RYALTRIS® Launch in Brazil

Glenmark Specialty S.A., a wholly-owned subsidiary of Glenmark Pharmaceuticals Ltd., (Glenmark), today announced the launch of RYALTRIS® Nasal Spray in Brazil for the treatment of moderate to severe symptoms associated with allergic rhinitis (AR) in adults and adolescents of 12 years of age and older. The launch follows regulatory approval granted by the Brazilian Health Regulatory Agency, Agência Nacional de Vigilância Sanitária (ANVISA) earlier this year

Kindly find attached media release which is self- explanatory.

Request you to kindly take the same on record.

Thanking You.

Yours faithfully,

For Glenmark Pharmaceuticals Limited

Rashmi Khandelwal
Company Secretary & Compliance Officer

Glenmark Expands Global Respiratory Innovation Footprint with RYALTRIS® Launch in Brazil

*Launch introduces Glenmark's differentiated dual-action therapy
for allergic rhinitis in Brazil*

*Further strengthens Glenmark's innovation-led respiratory portfolio and expands access across
Latin America*

Sao Paulo, Brazil and Mumbai, India, 11 September 2026 – Glenmark Specialty S.A., a wholly-owned subsidiary of Glenmark Pharmaceuticals Ltd., (Glenmark), today announced the launch of RYALTRIS® Nasal Spray in Brazil for the treatment of moderate to severe symptoms associated with allergic rhinitis (AR) in adults and adolescents of 12 years of age and older. The launch follows regulatory approval granted by the Brazilian Health Regulatory Agency, Agência Nacional de Vigilância Sanitária (ANVISA) earlier this year¹.

The launch reflects Glenmark's continued commitment to advancing its respiratory innovation journey and reinforces the Company's continued progress in expanding access to differentiated therapies across global markets.

Allergic rhinitis is a highly prevalent chronic condition in Brazil, affecting an estimated 20–30% of the population, equivalent to nearly 40–60 million people^{2,3}. This significant disease burden highlights the need for effective, convenient, and differentiated treatment options for patients across the country.

The launch of RYALTRIS® introduces the first olopatadine-containing intranasal combination therapy in Brazil, combining an antihistamine (olopatadine hydrochloride) and a corticosteroid (mometasone furoate) in a single nasal spray. This offers a differentiated dual-action treatment option for symptoms associated with allergic rhinitis.

Commenting on the launch, Marco Cerato, Executive Vice President & Global Head – Innovative Business, Glenmark Pharmaceuticals said, “The launch of RYALTRIS® in Brazil marks a significant milestone for our innovative respiratory portfolio and reflects our continued commitment to advancing respiratory care through science-led innovation and a patient-centric approach. As the largest healthcare market in Latin America, Brazil provides a strategic opportunity to bring this differentiated treatment option to patients and healthcare professionals.”

RYALTRIS® is Glenmark's first globally commercialized branded innovative product and has already been approved in 57 markets worldwide, including the United States, European Union, United Kingdom, Australia, South Korea, Russia, and China.
