H1 FY27 Financial Results and Business Update

Takyon Networks Limited Reports H1 FY27 Losses Amid Contractual and Cost Pressures; New Orders Support Recovery Outlook

The financial performance during the period was impacted by project execution challenges, elevated input costs and certain contractual limitations, which affected operating margins and overall profitability. However, the company has since witnessed encouraging business momentum, securing significant new project mandates across enterprise technology and railway infrastructure, strengthening its outlook for the second half of FY27.

Financial Performance

(₹ in Lakhs, except Earnings Per Share)

Particulars	H1 FY26	H2 FY26	H1 FY27
Revenue from Operations	3,061.39	2,834.42	3,061.39
EBITDA	794.54	77.88	794.54
EBITDA Margin	25.95%	2.75%	25.95%
Earnings Per Share	5.90	0.16	5.90
PAT	845.34	18.26	845.34
PAT Margin	27.35%	0.62%	27.35%

Factors Impacting H1 FY27 Performance

During the period, the company's financial performance was impacted by a combination of project execution and contractual challenges, primarily including:

- **Higher Project Execution Costs:** Extended project timelines increased input and operational costs.
- **Limited Price Escalation:** Contractual restrictions limited the recovery of incremental costs from customers, impacting margins.
- **Contractual Viability:** Rising execution costs affected project viability, resulting in lower margins and losses.
- **Project Continuity Changes:** Changes in project renewals created a mismatch between operational commitments and revenue, adding to manpower and operating costs.

These factors collectively impacted operating performance, resulting in negative EBITDA and losses during H1 FY27

Strengthening Order Pipeline and Business Momentum

At the end of H1 FY27, the company's order book stood at **₹11.80 crore. With fresh mandates secured post H1, the order book has since grown to ₹46.65 crore+**, strengthening the company's project pipeline and enhancing execution visibility for the coming quarters.

The following orders were secured during October and November 2026:

Enterprise Technology Project | ₹19.40 Crore

The company has secured an order from a leading energy exchange platform operator for enterprise IT hardware, networking, cybersecurity solutions and software licences. Delivery of hardware and materials is scheduled within 60 days.

Railway Infrastructure Project | ₹11.59 Crore

The company has secured an order from North Eastern Railway for datacom equipment and network connectivity upgrades across four divisions: Izzatnagar, Lucknow, Varanasi and Gorakhpur. The project is scheduled for execution over six months.

These mandates, aggregating **₹30.99 crore**, reflect the company's continued ability to secure opportunities across diverse technology and infrastructure segments.

Outlook for H2 FY27

With a strengthened project pipeline and fresh mandates, the company remains optimistic about business momentum in H2 FY27. The improved order pipeline provides better visibility and a stronger foundation for upcoming project execution.

Management remains focused on timely project delivery, improving execution efficiency, optimising costs and strengthening operating margins.

» The company continues to prioritise commercial viability, disciplined project selection and sustainable long-term growth.

About Takyon Networks Limited

Takyon Networks Limited is a fast-growing provider of networking and IT infrastructure solutions, delivering integrated services across data centres, cloud, cybersecurity and managed IT solutions. The company operates through an asset-light, solutions-driven business model focused on customised technology solutions and scalable infrastructure.
