Sub: Intimation regarding Launch of an Industry Supported Lab in the Instrumentation & Control (I&C) Department.

Dear Sir/Madam,

Pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended, we hereby inform that Axis Solutions Limited ("the Company"), in collaboration with Government Engineering College, Gandhinagar ("GEC Gandhinagar"), has launched an Industry Supported Lab in the Instrumentation & Control (I&C) Department of GEC Gandhinagar.

A detailed communication in this regard is enclosed herewith for your information and records.

You are requested to take the aforesaid information on your record.

Thanking you,
Yours faithfully,

For. **Axis Solutions Limited**
(Formerly Known as Asya Infosoft Limited)

Industry Supported Lab - An Initiative by Axis Solutions × GEC Gandhinagar

Building Industry Ready Talent for the Next Phase of Industrial Technology Growth

Axis Solutions Limited, a BSE listed provider of industrial automation, instrumentation, analytical technology and turnkey system integration solutions, in collaboration with Government Engineering College Gandhinagar (GEC Gandhinagar), today launched an **Industry Supported Lab in the Instrumentation & Control (I&C) Department**.

The initiative strengthens the connection between industry and academia by bringing real world industrial technologies closer to engineering education. For Axis Solutions, the Lab represents a **strategic investment in building an industry ready talent pipeline** as the company continues to expand its business across industrial automation, instrumentation, analytical systems and turnkey solutions.

As Axis scales its business and project execution capabilities, access to technically skilled engineers with practical understanding of industrial technologies will become increasingly important. The Lab creates an early engagement platform for Axis to develop and identify engineering talent through technical programmes, internships and placement opportunities while helping bridge the gap between academic knowledge and practical industrial requirements.

Commenting on the initiative, **Dr. Bijal Sanghvi, Managing Director, Axis Solutions Limited**, said, “**As Axis continues to expand, building access to industry ready engineering talent is an important part of our long term growth strategy. This Industry Supported Lab is an investment in that future, helping bridge the gap between engineering education and real industrial requirements while strengthening the talent ecosystem needed to support the industry's growth.**”

Under the initiative, Axis Solutions will contribute **industrial, automation, analytical and instrumentation products and system solutions**, while GEC Gandhinagar will provide the required facility and infrastructure. The Lab will support expert and SME sessions, Faculty Development Programmes, internships, placement initiatives, skill development programmes, industrial study tours and short term continuing education.

The collaboration also enables Axis to build sustained engagement with engineering talent and strengthen awareness of its technologies among future professionals. Through continued interaction with academia, the company can contribute to developing skills aligned with the evolving requirements of industrial automation, instrumentation, analytical technology and process systems.

The initiative reflects Axis Solutions' focus on strengthening the **human capital required for sustainable growth and scalability**. By developing stronger connections with engineering institutions, Axis aims to create a long term talent ecosystem that can support its future workforce requirements while contributing to India's growing industrial technology sector.

[About Axis Solutions Limited](#)

Axis Solutions Limited is a **BSE listed Liquid and Gas Analyzer Turnkey Solution Provider and system integrator**, offering systems and products across measurement and analytical technologies, automation, control, communication and IoT.

The company has an in house **Government of India / DSIR approved R&D Centre** focused on developing innovative solutions for industrial applications including hazardous locations.
